Rare Disease Pharma Company CRM Strategy

Objectives, KPIs, CRM Journey

CONFIDENTIAL. FOR INTERNAL USE ONLY.

PROJECT BACKGROUND

Project Goals

1

Assess the existing PMO CRM activity for both caregiver/patient and HCP

2

Develop CRM strategy, architecture, content map, and flow for both caregiver/patient and HCP

Overall Phased CRM Approach

Phase 1	Phase 2	Phase 3
Assess & Refine Content	**Evolve & Segment**	**Continued Engagement & Refinement of Database**
Refine Current State of Existing Email Infrastructure - Assess current CRM infrastructure and content - Align on plans for CRM evolution - Edit and distribute new email content to continue existing relationships	**Evolve Email to a Full CRM focusing on Growth and Audience Learning** - With a focus on acquisition and segmentation of target audiences, develop new email, content and traffic drivers - Begin to acquire new leads and segment	**Continue to Engage Database and Refine and Scale Against Business Objectives** - With established baselines, continue to grow and adapt CRM with refreshed email content and supporting site content

Overall CRM Objectives – Caregiver/Patient

Phase 1: Assess & Refine Content

Objective
Lead DMD Caregivers/Patients through the customer journey from unbranded to branded content

KPI 1
Engagement with content on Duchenne.com
- Total number of visitors
- Returning visitors
- Avg. session duration
- Landing pages
- Bounce pages
- Traffic sources

Phase 2: Evolve & Segment

Objective
Grow and segment the Caregiver/Patient CRM database

KPI 1
Acquisition of new caregivers into CRM
- Number of form fills to “stay connected” on Duchenne.com
- Number of form fills to “stay informed” on product sites

KPI 2
Engagement with new caregivers in CRM
- Open rate
- Skim rate
- Read rate
- CTR
- Link clicks
- Actions taken on website via email
- Unsubscribes

Phase 3: Continued Engagement & Refinement of Database

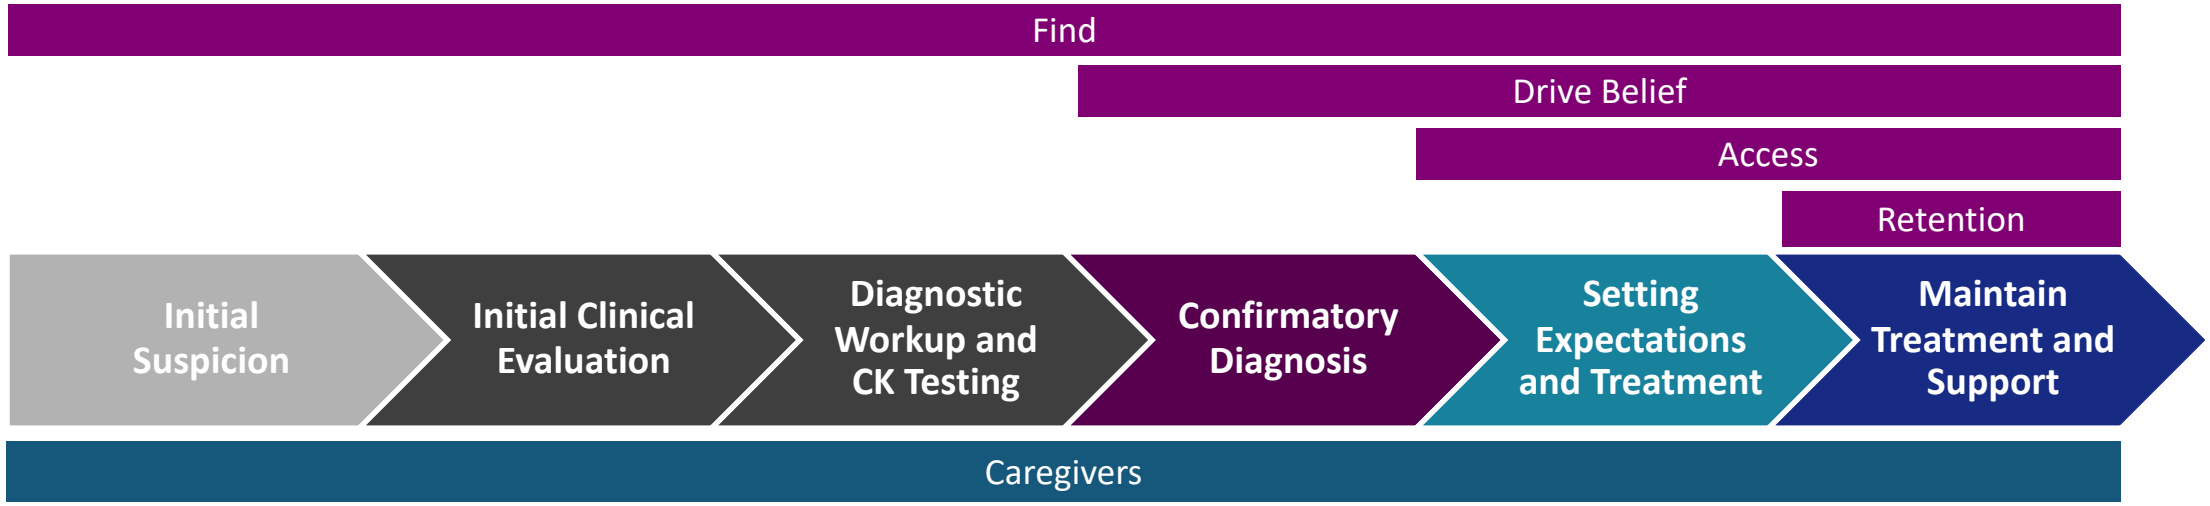
Objective
Maintain engagement and scale and refine the Caregiver/Patient CRM

KPI 1
Quantity of respondents
- Number of form fills to “stay connected”

KPI 2
Retention of users
- Email unsubscribes
- Number of email opens
- Email unsubscribes
- Email bounces

KPI 3
Contacts moved through the funnel
- Actions taken on the website via email

Overarching Patient Journey



Caregiver/Patient

CRM Objectives

CONFIDENTIAL. FOR INTERNAL USE ONLY.

AUDIENCE STAGES, UNMET NEEDS, AND OBJECTIVES

Caregiver/Patient

Caregiver Journey and Unmet Needs

Journey Stage	Initial Suspicion	Initial Clinical Evaluation	Diagnostic Workup and CK Testing	Confirmatory Diagnosis	Setting Expectations and Starting Treatment	Maintain Treatment and Support
Caregiver State	Caregivers of potentially **undiagnosed** DMD patients			Caregivers of **newly diagnosed** DMD patients who are RNA treatment eligible	Caregivers of those **considering treatment** options, including RNA therapy	Caregivers of those **on treatment.** Those looking for general **disease support**
Unmet Need	Understanding of what a neuromuscular disorder is, what is involved in diagnosing, and how to communicate with pediatrician about red flags, and advocate for testing.			Understanding of Duchenne, the role of genetics and the urgency to treat	How to speak with specialists, what is the treatment journey, and the differentiators between company's therapy options and support	Community support, reimbursement assistance, treatment requirements and additional resources for the child

CRM Objectives – Caregivers/Patients

Lead DMD Caregivers/Patients through the customer journey from unbranded to branded content.

Journey Stage	**Initial Suspicion**	**Initial Clinical Evaluation**	**Diagnostic Workup and CK Testing**	**Confirmatory Diagnosis**	**Setting Expectations and Treatment**	**Maintain Treatment and Support**
Caregiver State	Caregivers of potentially **undiagnosed** DMD patients			Caregivers of **newly diagnosed** DMD patients who are RNA treatment eligible	Caregivers of those **considering treatment** options, including RNA therapy	Caregivers of those **on treatment.** Those looking for general **disease support**
Unmet Need	Understanding of what a neuromuscular disorder is, what is involved in diagnosing, and how communicate with pediatrician about red flags, and testing.			Understanding of Duchenne, the role of genetics and the urgency to treat	How to speak with specialists, what is the treatment journey, therapy options and support	Community support, reimbursement assistance, treatment requirements and additional resources for the child
CRM Objectives	**1** Drive awareness of the signs and symptoms of Duchenne	**2** Expand the understanding of early intervention and its importance		**3** Increase awareness of therapy options for the ambulatory and non-ambulatory populations	**5** Drive engagement with support resources and the community **4** Establish confidence in discussing DMD and advocating for their child	**6** Generate awareness of Patient Assistance Program and the process of starting and staying on therapy

INITIAL CLINICAL EVALUATION
DIAGNOSTIC WORKUP & TESTING

Caregiver/Patient

Caregiver/Patient CRM Objective 1

Drive awareness of the signs and symptoms of Duchenne

	KPI 1	KPI 2
KPI	**Engagement with "About Duchenne" web page on Duchenne.com**	**Engagement with the "Diagnosing Duchenne" page on Duchenne.com**
Key Site Action (KSA)	Percentage of page scroll depth on page from email as a traffic medium Link clicks (PDF Downloads) of the "Doctor Discussion Guide" from email as a traffic medium • Page views from email as a traffic medium • Avg. time on page from email as a traffic medium • Bounce rate from email as a traffic medium	Link clicks (PDF Downloads) of the "Genetic Testing Guide" from email as a traffic medium • Page views from email as a traffic medium • Avg. time on page from email as a traffic medium • Bounce rate from email as a traffic medium Link clicks (PDF Downloads) of the "Doctor Discussion Guide" from email as a traffic medium *Link clicks (PDF Downloads) of the "CK Testing Guide" from email as a traffic medium
Secondary KSA	Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Avg. time on page from email as a traffic medium Percentage of page scroll depth on page from email as a traffic medium Bounce rate from email as a traffic medium Video views for "Diagnosis: One Family's Journey" from email as a traffic source Video completions for "Diagnosis: One Family's Journey" from email as a traffic source

New Content Recommendation

***CK testing guide for caregivers/patients**

Caregiver/Patient CRM Objective 2

Expand the understanding of early intervention and its importance

	KPI 1	KPI 2	KPI 3
KPI	**Engagement with the "Diagnosing Duchenne" page on Duchenne.com**	**Engagement with the "The Role of Genetics" web page on Duchenne.com**	**Engagement with Patient Assistance Program**
Key Site Action (KSA)	Link clicks (PDF Downloads) of the "Genetic Testing Guide" from email as a traffic medium • Page views from email as a traffic medium • Avg. time on page from email as a traffic medium • Bounce rate from email as a traffic medium Link clicks (PDF Downloads) of the "Doctor Discussion Guide" from email as a traffic medium *Link clicks (PDF Downloads) of the "CK Testing Guide" from email as a traffic medium	*Link clicks (PDF Downloads) of the "Genetic Testing Guide" from email as a traffic medium Number of submissions (goal completions) of the exon completion tool on "The Role of Genetics" page from email as a traffic medium Button clicks on "Explore the process of diagnosis" from email as a traffic medium	Button clicks on CTA: Call 1-888-xxx-xxxx Page visits to [LANDING PAGE LINK] from email as a traffic medium Avg. time on page from email as a traffic medium
Secondary KSA	Avg. time on page from email as a traffic medium Percentage of page scroll depth on page from email as a traffic medium Bounce rate from email as a traffic medium Video views for "Diagnosis: One Family's Journey" from email as a traffic source Video completions for "Diagnosis: One Family's Journey" from email as a traffic source	Avg. time on page from email as a traffic medium Percentage of page scroll depth on page from email as a traffic medium	Percentage of page scroll depth on landing page Clicks on landing page in footer on DSA website from email as a traffic medium Bounce rate from email as a traffic medium

New Content Recommendation

***Add Genetic Testing Guide link**

CONFIRMATORY DIAGNOSIS

Caregiver/Patient

Caregiver/Patient CRM Objective 3

Increase awareness of therapy options for the ambulatory and non-ambulatory populations

	KPI 1	KPI 2	KPI 3
KPI	**Engagement with the "Research Strategies Targeting Dystrophin" web page on DSA website**	**Engagement with the "Research Approaches Targeting Muscle Growth and Protection" page on DSA website**	**Engagement with Branded Website**
Key Site Action (KSA)	Button clicks to the "GT-FAQ video series" from email as a traffic medium Button clicks (downloads) of the "Antibody Testing Fact Sheet" from email as a traffic medium	Button clicks to the "Clinical Trials" web page from email as a traffic medium	Button clicks on CTA: Call 1-888-xxx-xxxx Page visits to patient assistance program landing page from email as a traffic medium Avg. time on page from email as a traffic medium
Secondary KSA	Avg. time on page from email as a traffic medium Percentage of page scroll depth from email as a traffic medium Bounce rate from email as a traffic medium	Avg. time on page from email as a traffic medium Percentage of page scroll depth from email as a traffic medium Bounce rate from email as a traffic medium	Percentage of page scroll depth on landing page Clicks on Assistance Program in footer on DSA website, branded, or specific treatment website from email as a traffic medium Bounce rate from email as a traffic medium

Caregiver/Patient CRM Objective 3 Cont.

Establish confidence in discussing DMD and advocating for their child

	KPI 5	KPI 6	KPI 7	KPI 8
KPI	**Engagement with the "Talking about Duchenne" web page on DSA website**	**Engagement with the "Making Friends and Being Social" web page on DSA website**	**Engagement with the "Mental Health" web page on DSA website**	**Engagement with Patient Assistance Program**
Key Site Action (KSA)	Link clicks (PDF downloads) of "Conversations About Duchenne" brochure on page from email as a traffic medium • Page views from email as a traffic medium • Avg. time on page from email as a traffic medium • Bounce rate from email as a traffic medium Page views from email as a traffic medium Percentage of page scroll depth on page from email as a traffic medium	Video views from email as a traffic medium Percentage of page scroll depth from email as a traffic medium	Video views from email as a traffic medium Percentage of page scroll depth from email as a traffic medium	Button clicks on CTA: Call 1-888-xxx-xxxx Page visits to assistance program landing page from email as a traffic medium Avg. time on page from email as a traffic medium
Secondary KSA	Page views from email as a traffic medium Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Page views from email as a traffic medium Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Page views from email as a traffic medium Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Percentage of page scroll depth on landing page Clicks on Assistance Program in footer on DSA website from email as a traffic medium Bounce rate from email as a traffic medium

SETTING EXPECTATIONS & TREATMENT

Caregiver/Patient

Caregiver/Patient CRM Objective 4

Establish confidence in discussing DMD and advocating for their child

	KPI 1	KPI 2	KPI 3	KPI 4
KPI	**Engagement with "Engaging with Various Specialist"**	**Engagement "Community Resources" web page on DSA website**	**Engagement with the "Support and Independence" web page on DSA website**	**Engagement with the "Education" web page on DSA website**
Key Site Action (KSA)	Link clicks (PDF Downloads) of the "Management of Duchenne" brochure from email as a traffic medium • Page views from email as a traffic medium • Avg. time on page from email as a traffic medium • Bounce rate from email as a traffic medium Avg. time on page from email as a traffic medium Percentage of page scroll depth from email as a traffic medium	Video views from email as a traffic medium Button clicks to browse Patient Forum testimonial videos on YouTube from email as a traffic medium Link clicks on page from email as a traffic medium	Percentage of page scroll depth from email as a traffic medium Link clicks on "Share your ideas at hello@company.com" from email as a traffic medium Emails submitted to hello@company.com	Video views from email as a traffic medium Percentage of page scroll depth from email as a traffic medium
Secondary KSA	Page views from email as a traffic medium Bounce rate from email as a traffic medium	Percentage of page scroll depth from email as a traffic medium Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Page views from email as a traffic medium Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Avg. time on page from email as a traffic medium Percentage of page scroll depth from email as a traffic medium Bounce rate from email as a traffic medium

New Content Recommendation

***Add "Engaging with Various Specialists" page**

Caregiver/Patient CRM Objective 5

Drive engagement with support resources and the community

	KPI 1	KPI 2	KPI 3
KPI	**Engagement with the "Patient Forum Engagers Videos" on "Duchenne Wisdom" page on DSA website**	**Engagement with the "Support and Independence" web page on DSA website**	**Join Patient Forum Group**
Key Site Action (KSA)	Video views from email as a traffic medium Button clicks to browse the rest of the videos on YouTube *Link clicks to Patient Forum landing page	Video views of each video on the page from email as a traffic medium Percentage of scroll depth from email as a traffic medium Avg. time on page from email as a traffic medium	*Form submissions (goal completions) on Patient Forum landing page from email as a traffic medium *Sign ups for Patient Forum Events from email a a traffic source
Secondary KSA	Percentage of page scroll depth from email as a traffic medium Button clicks to Support & Independence, Education, and mental health web pages from email as a traffic medium Video view duration from email as a traffic medium Average percentage of video viewed from email as a traffic medium Bounce rate from email as a traffic medium	Avg. time on page from email as a traffic medium Bounce rate from email as a traffic medium	Avg. time on page from email as a traffic medium Percentage of page scroll depth from email as a traffic medium Bounce rate from email as a traffic medium

New Content Recommendation

***Landing page for Patient Forum**

***Link to the landing page**

***Patient Forum form on landing page**

***Patient Forum event registration form**

MAINTAIN TREATMENT & SUPPORT

Caregiver/Patient

Caregiver/Patient CRM Objective 6

Generate awareness of Patient Assistance Program and the process of starting and staying on therapy

	KPI 1	KPI 2	KPI 3
KPI	**Engagement with the Patient Assistance Program**	**Watch Patient Forum Engager Videos on Patient Forum landing page**	**Engagement with the pages under "Living with Duchenne" website section on DSA website**
Key Site Action (KSA)	Button clicks on CTA: Call 1-888-xxx-xxxx from email as a traffic medium Page visits to Patient Assistance Program landing page from email as a traffic medium	Video views on YouTube playlist from email as a traffic medium Click to YouTube playlist from email as a traffic medium	Percentage of page scroll depth from email as a traffic medium Avg. time of page from email as a traffic medium Video Views from Email as a traffic medium Downloads from email as a traffic medium
Secondary KSA	Percentage of page scroll depth on Patient Assistance Program landing page from email as a traffic medium Clicks on Patient Assistance Program in footer on DSA website from email as a traffic medium Bounce rate from email as a traffic medium Avg. time on page from email as a traffic medium	Video starts from email as a traffic medium Total video views from email as a traffic medium Video completions from email as a traffic medium	Bounce rate from email as a traffic medium Page views from email as a traffic medium

CRM Journey - Updates

Caregiver/Patient

01.11.2023

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Agenda

- Review and Background
  - Review of the CRM process and where we're at in the process
  - Context and objectives of this phase of the project
  - Review of persona development
  - Review of patient journey
- DMD Awareness Journey
  - Current State
  - Optimized State based on journey
- Patient Forum Journey
  - Current State
  - Optimized State based on journey
- GT-FAQ Journey
  - Current State
  - Optimized State based on journey
- Optimized Email Configuration based on patient journey and personas
- Objectives and KPI mapping for each phase of email journey
- Next Steps

Overall Phased CRM Approach: Starting Phase 2

Phase 1	Phase 2	Phase 3
Assess & Refine Content	Evolve & Segment	Continued Engagement & Refinement of Database
Refine Current State of Existing Email Infrastructure - Assess current CRM infrastructure and content - Align on plans for CRM evolution - Edit and distribute new email content to continue existing relationships	Evolve Email to a Full CRM focusing on Growth and Audience Learning - With a focus on acquisition and segmentation of target audiences, develop new email, content and traffic drivers - Begin to acquire new leads and segment	Continue to Engage Database and Refine and Scale Against Business Objectives - With established baselines, continue to grow and adapt CRM with refreshed email content and supporting site content

Established Objectives & KPIs

Created Personas

Evolve Email and Journey against Personas

Background Context and Objectives

OBJECTIVES

- **Map existing email journeys to personas and patient journey**
- **Minimize significant change in current email content across DMD Awareness, Patient Forum and GT-FAQ journeys**
- **Identify any outages/opportunities for new email content, surveys, exits to branded, and resends**
- **Map objectives and KPIs to email journeys**

CONTEXT

- **Audit:** We audited the DMD Awareness Journey and the Patient Forum Journey to discover cadence, content themes and topics
- **Map Emails to Personas:** Based on the unmet needs of the new personas, we mapped the emails and themes to the personas
- **Map Emails to Journey:** Since personas are mapped to the patient journey, we mapped the existing emails (DMD Awareness and Patient Forum) to the patient journey; creating a new email cadence
- **GT FAQ Journey:** The GT-FAQ journey has been lightly re-organized. Due to the size of the journey, an icon is used to indicate the start of the journey in the master
- **Outages & Opportunities:** Discovered some outages where new emails can be crafted for additional information

Grounding Review of Our CRM Objectives – Caregivers/Patients

Lead DMD Caregivers/Patients through the customer journey from unbranded to branded content.

Journey Stage	**Initial Suspicion**	**Initial Clinical Evaluation**	**Diagnostic Workup and CK Testing**	**Confirmatory Diagnosis**	**Setting Expectations and Treatment**	**Maintain Treatment and Support**
Caregiver State	Caregivers of potentially **undiagnosed** DMD patients			Caregivers of **newly diagnosed** DMD patients who are RNA treatment eligible	Caregivers of those **considering treatment** options, including RNA therapy	Caregivers of those **on treatment.** Those looking for general **disease support**
Unmet Need	Understanding of what a neuromuscular disorder is, what is involved in diagnosing, and how communicate with pediatrician about red flags, and testing.			Understanding of Duchenne, the role of genetics and the urgency to treat	How to speak with specialists, what is the treatment journey, therapy options and support	Community support, reimbursement assistance, treatment requirements and additional resources for the child
CRM Objectives	**1** Drive awareness of the signs and symptoms of Duchenne; Prompt Testing			**3** Increase awareness of therapy options for the ambulatory and non-ambulatory populations		
		2 Expand the understanding of early intervention and its importance			**5** Drive engagement with support resources and the community	
					4 Establish confidence in discussing DMD and advocating for their child	**6** Generate awareness of Patient Assistance Program and the process of starting and staying on therapy

Personas against the journey allows us to communicate effectively against our business objectives, drive disease awareness to branded comms

Attributes for Persona Dev

Required Attributes to define Persona

Used to define personas

- Duchenne Relationship
- Dx Status
- Dx Date
- Tx Status
- Ambulation Status

Optional CRM Journey Defining Attributes

Used to define journey experience, cadence and content

- ~~Tx Knowledge~~
- Information Needed
- Info Frequency
- Tx Research Interest

Long-Term Marketing Attributes

Used to define longer-term relationship

- Birth Year

Key: New Attribute | Existing Attribute

Caregiver Personas

Anyone who is looking for information about DMD who is not a CG or PT

Mom who thinks her son has an NMD and looking for more info

Mom overwhelmed by what is next for child with DMD

Mom looking for more support and resources for their child on therapy

C. Unknown/Blank	C. Suspecting	C. Diagnosed	C. On Therapy
Dx Status	Dx Status	Dx Status	Dx Status
Unknown	Suspicious	Confirmed	Confirmed
Tx Status	Tx Status	Tx Status	Tx Status
Unknown	Not on Therapy	Not on Therapy	On Therapy
Dx Date	Dx Date	Dx Date	Dx Date
N/A	N/A	Date	Date

Patient Personas

Anyone who is looking for information on DMD (exclude based on age)

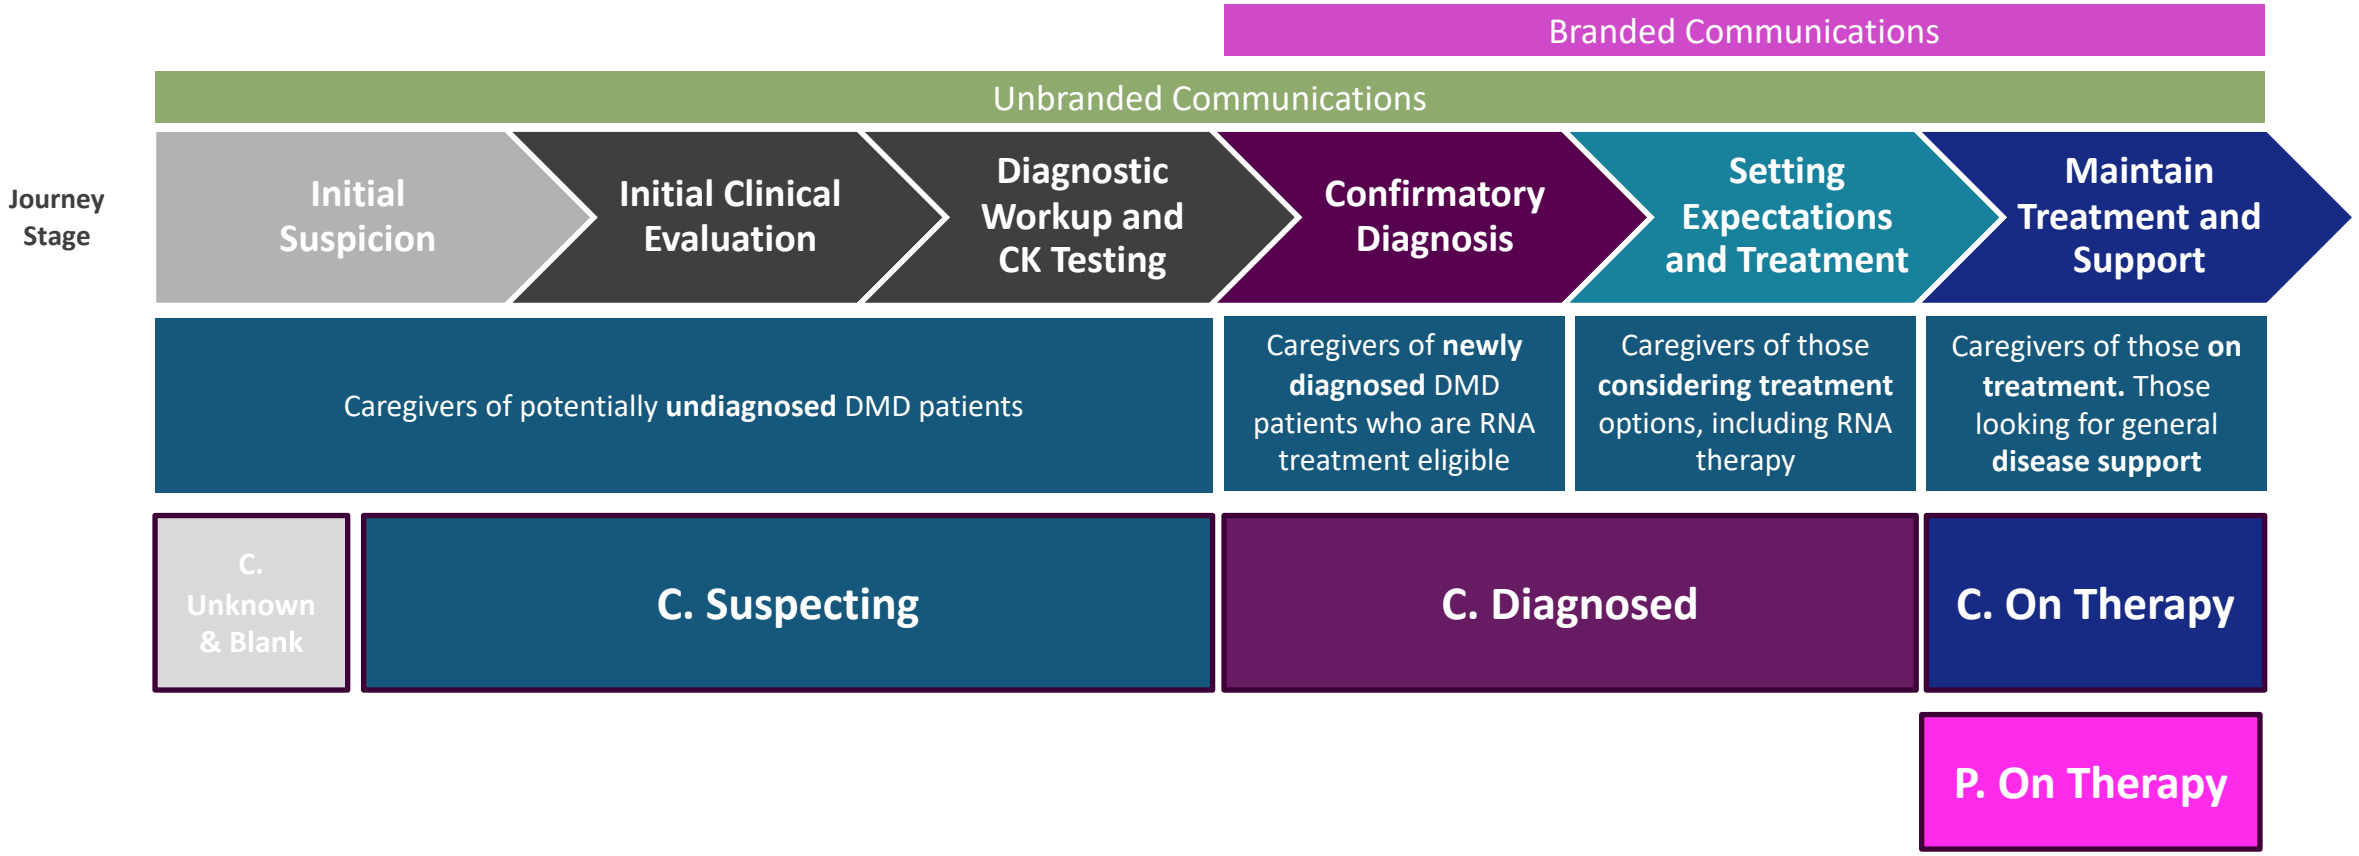
Patient who is diagnosed and looking for info (exclude based on age)

Patient on therapy looking for support and resources

P. Unknown/Blank	P. Diagnosed	P. On Therapy
Tx Status	Tx Status	Tx Status
Unknown	Not on Therapy	On Therapy
Dx Status	Dx Status	Dx Status
Unknown	Confirmed	Confirmed
Dx Date	Dx Date	Dx Date
Unknown	Date	Date
N/A		
Birth Year	Birth Year	Birth Year
Unknown/Blank	Date	Date

Reviewing Caregiver and Patient alignment to Journey Stages

Even though we're primarily focusing on Diagnosed and On Therapy, we are making room for those who are suspecting an issue with muscular development (suspecting) and those who may be looking for more information and not a caregiver or patient (unknown); we can qualify them later in the journey



DMD Awareness Journey

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Exploring Emails, Cadence, Follow Up

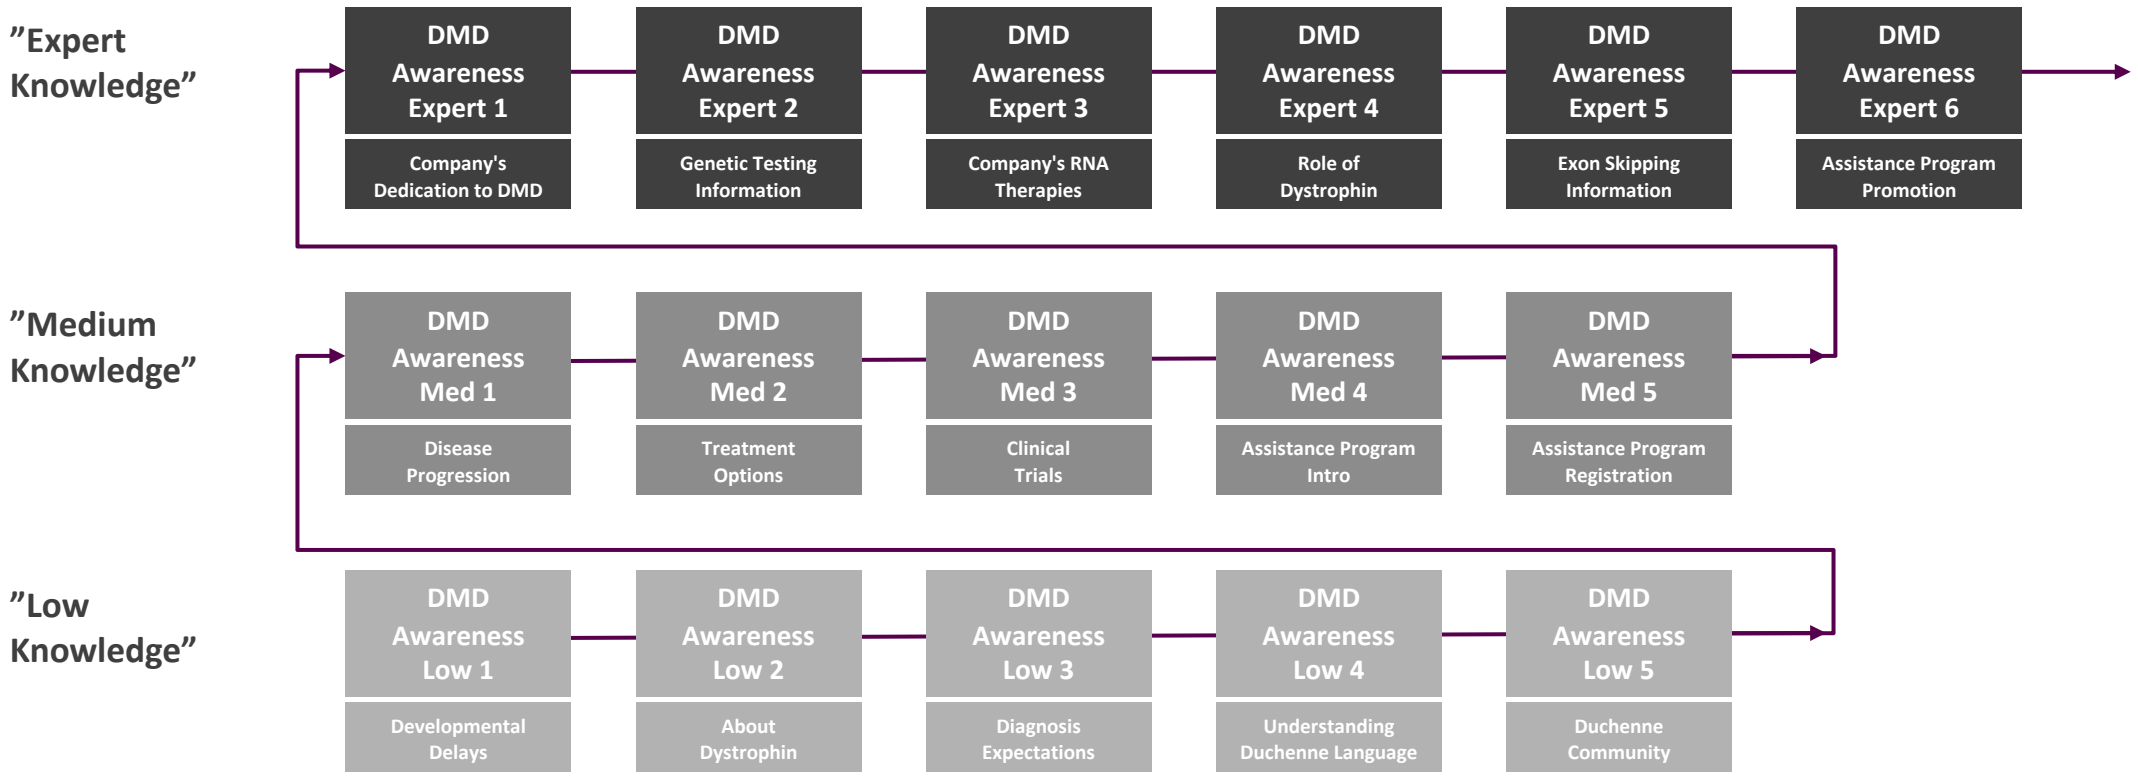
In the following section, we will explore the existing emails and determine the new cadence against the personas and patient journey

To assist, below is an iconography legend:

Existing Emails and Subject Lines			New Email Recommendation		Email Actions		
DMD Awareness Subject	Patient Forum Email Subject	GT-FAQ Subject	Email Identifier Welcome	Survey	Resend	Branded Start	GTx Start
Each of the current DMD Awareness emails has a corresponding module that lists its current stage (Low, Med, Expert) and the subject line	Each of the current Patient Forum emails has their corresponding module that lists its stage and the subject of the email	Each of the current GT-FAQ emails and their corresponding subject matter. Each email is numbered based on their original phase in the journey	Modules indicate potential email recommendations for creation	Identifier to locate an ideal time to issue a survey to gather more information on each persona	Resend action if the respondent doesn't open email	Recommendation for start of a Caregiver branded email journey directing to Branded Splitter Website and product information	Recommended starting point for the GT-FAQ journey to begin (in parallel with master email journey)

Starting with Existing DMD Awareness Journey

Current state of email and corresponding subject matter organized by self-reported knowledge user state and email cadence.

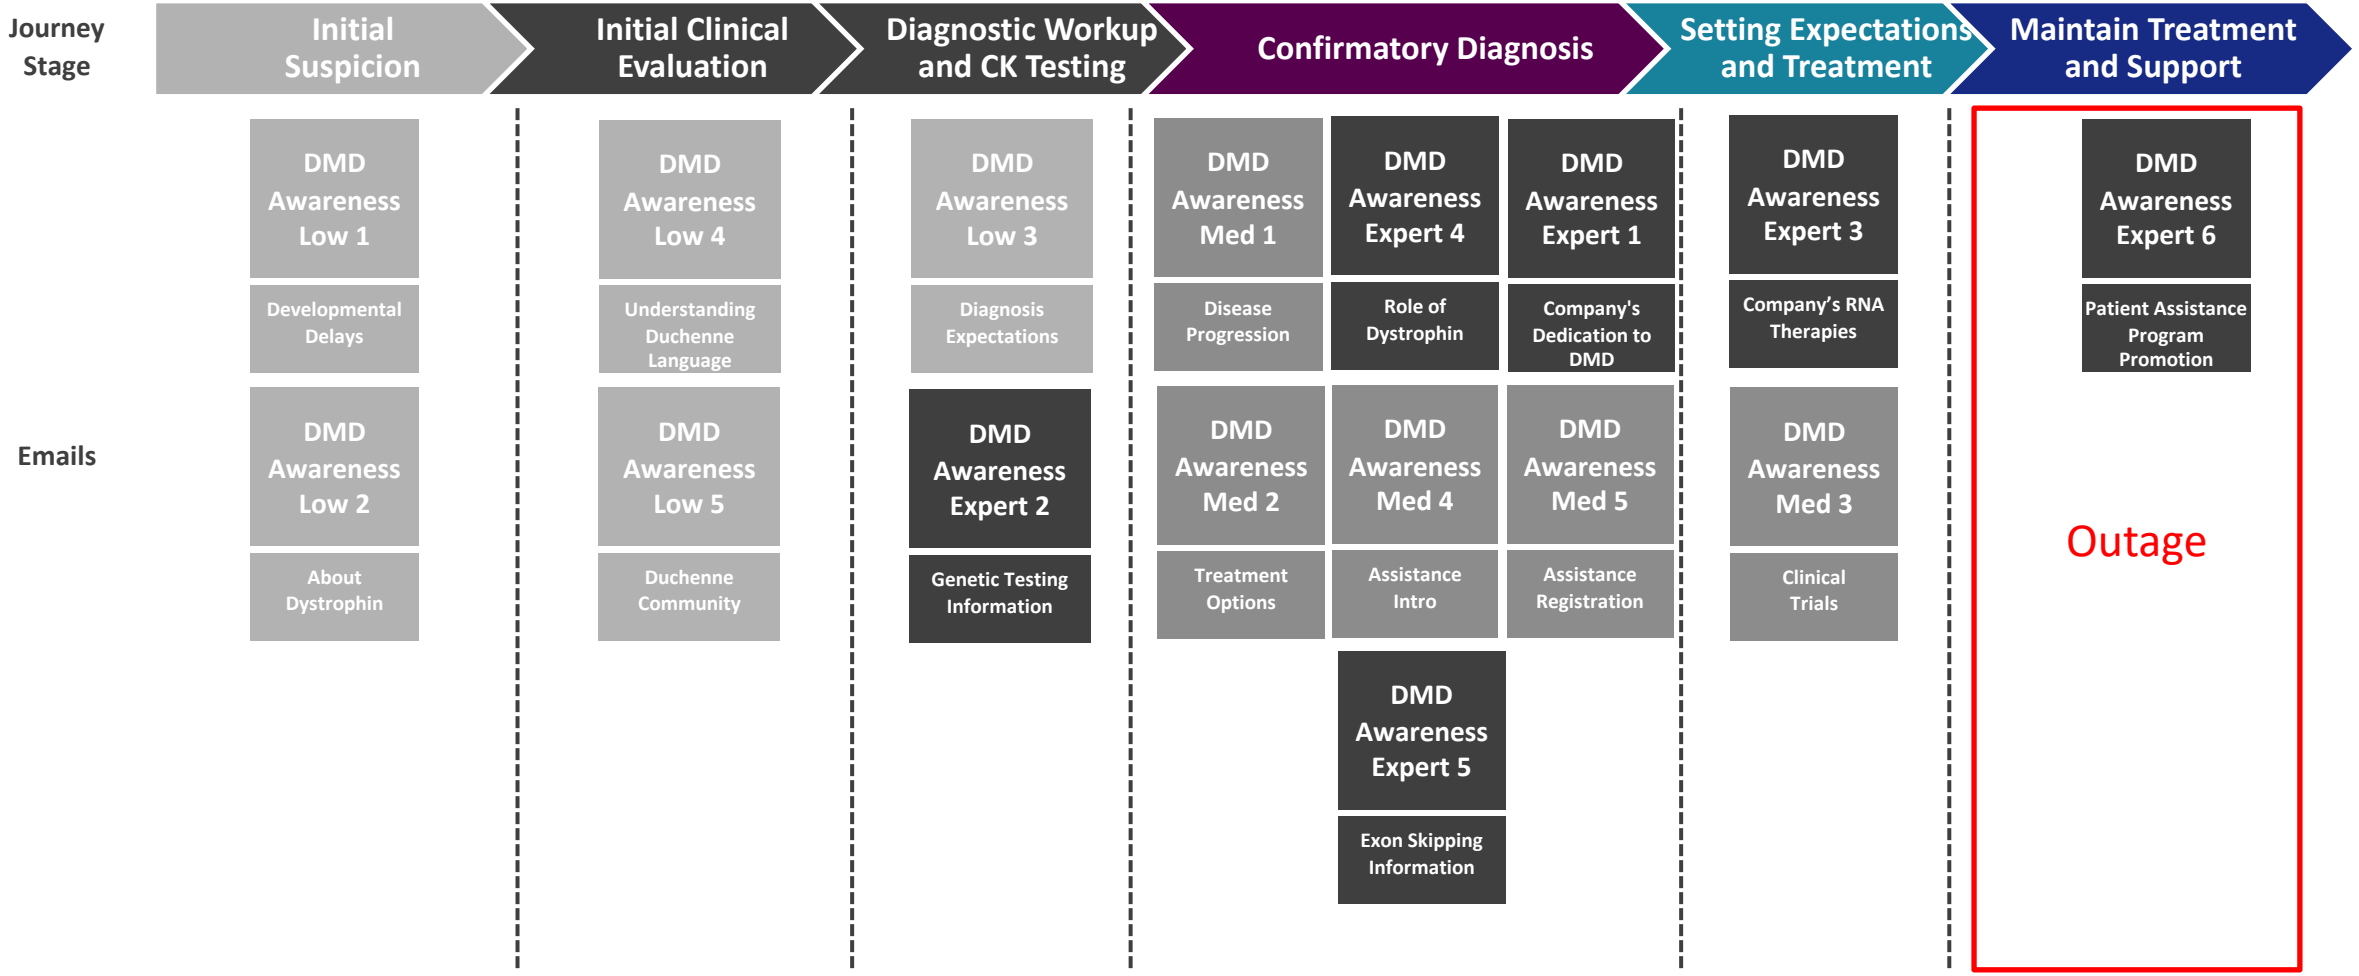


Going deeper into each email to uncover themes and topics to be used in journey analysis

	Low Awareness					Medium Awareness					High Awareness					
Emails	**Email 1**	**Email 2**	**Email 3**	**Email 4**	**Email 5**	**Email 1**	**Email 2**	**Email 3**	**Email 4**	**Email 5**	**Email 1**	**Email 2**	**Email 3**	**Email 4**	**Email 5**	**Email 6**
Theme	**Developmental Delays**	**About Dystrophin**	**Diagnosis Expectations**	**Understanding Duchenne Language**	**Duchenne Community**	**Disease Progression**	**Treatment Options**	**Clinical Trials**	**Assistance Program Intro**	**Assistance Program Registration**	**Company's Dedication to DMD**	**Genetic Testing Information**	**Company's RNA Therapies**	**Role of Dystrophin**	**Exon Skipping Information**	**Assistance Program Promotion**
Subject Line	Developmental delays and muscle weakness? It may be DMD	How does dystrophin affect Duchenne?	What to expect with a Duchenne diagnosis	Arm yourself with Duchenne knowledge	How you can become part of the Duchenne community	Next Steps for your child with Duchenne	Duchenne Treatment Options	Learn more about clinical trials for Duchenne	Support for managing Duchenne	How to get personalized support for your Duchenne journey	Company's dedication to fighting Duchenne	Get Duchenne genetic testing information	RNA therapy for Duchenne	Learn about the role of dystrophin restoration in Duchenne	Exon skipping and Duchenne - what to know	Assistance Program - Duchenne support by your side
Email Topics	Welcome to Patient Community	Duchenne Dystrophin Connection	Confirming a Duchenne diagnosis	Talk the Duchenne Talk (Glossary)	Duchenne Community	Welcome to the Patient Community	Duchenne treatment options	Learn about Clinical Trials	Where can I find help?	Assistance Program About	Welcome to the Patient Community	Genetic Testing What can It Tell Us?	Company's exon-skipping therapies	The Duchenne-dystrophin connection	Getting educated about Company's FDA-approved therapies	Contact Assistance Program – support by your side
	Intro to Email Series	A necessary protein for muscles	Decode Duchenne (free genetic testing)	Make your Own Cheat Sheet	Connecting with your Duchenne Community	Duchenne is a Progressive Muscle-Weakening Disease	Steroids	Benefits/Risks for Clinical Trials	Download the management of Duchenne Resource	Assistance Program Case Manager Benefits	Company X is dedicated to the Duchenne Community	Genetic Testing: The first step towards options	How exon-skipping therapies work	Dystrophin - a necessary protein for muscles	Don't wait to learn about treatment considerations	Watch a video for family's perspective
	Developmental Delays - Signs of Muscle Weakness	How does lack of dystrophin cause Duchenne?	Time to Test is Now	Continue Discussing Duchenne with Other	Learn about how the community can support you	Phases of Progression	RNA Therapy	How do I join a Clinical Trial	Patient Assistance Program	Find out More about Patient Assistance Program	Types of Genetic Therapies	Therapeutic options	Learn more about Company's pioneering RNA technologies	How does lack of dystrophin cause Duchenne?	Contact Assistance Program– Support, by your side	Navigating the Patient Assistance Program Process
	Talk to your Pediatrician	How can the lack of dystrophin be addressed	Learn more about diagnostic testing	Download Conversations about Duchenne Guide	Connect with the Duchenne Community	Learn more about what to expect	Clinical Trials	Clinical Study Criteria	Assistance Program Benefits	Register for	Discuss your needs with your doctor	Working with Decode Duchenne		What can we do about the lack of dystrophin?	Register for personalized support	Patient Assistance Program Resources
	Download Doctor Discussion Guide	Learn more about the role of dystrophin		Talk about Duchenne			Evaluating Options	Learn more about clinical Trials	Call Assistance Program		Learn more about resources for the Duchenne community	Learn more about Genetic Testing for Duchenne		Genetic testing is the way to determine if your child is amenable		Learn more about Assistance Program
	What is DMD						Learn more about treatment approaches		Learn how Assistance Program Can Help					On Company X's treatment, Assistance Program can help you		
	Duchenne by the Numbers													Call Assistance Program		
	Verify Your Child's Health													Find out More About Dystrophin		

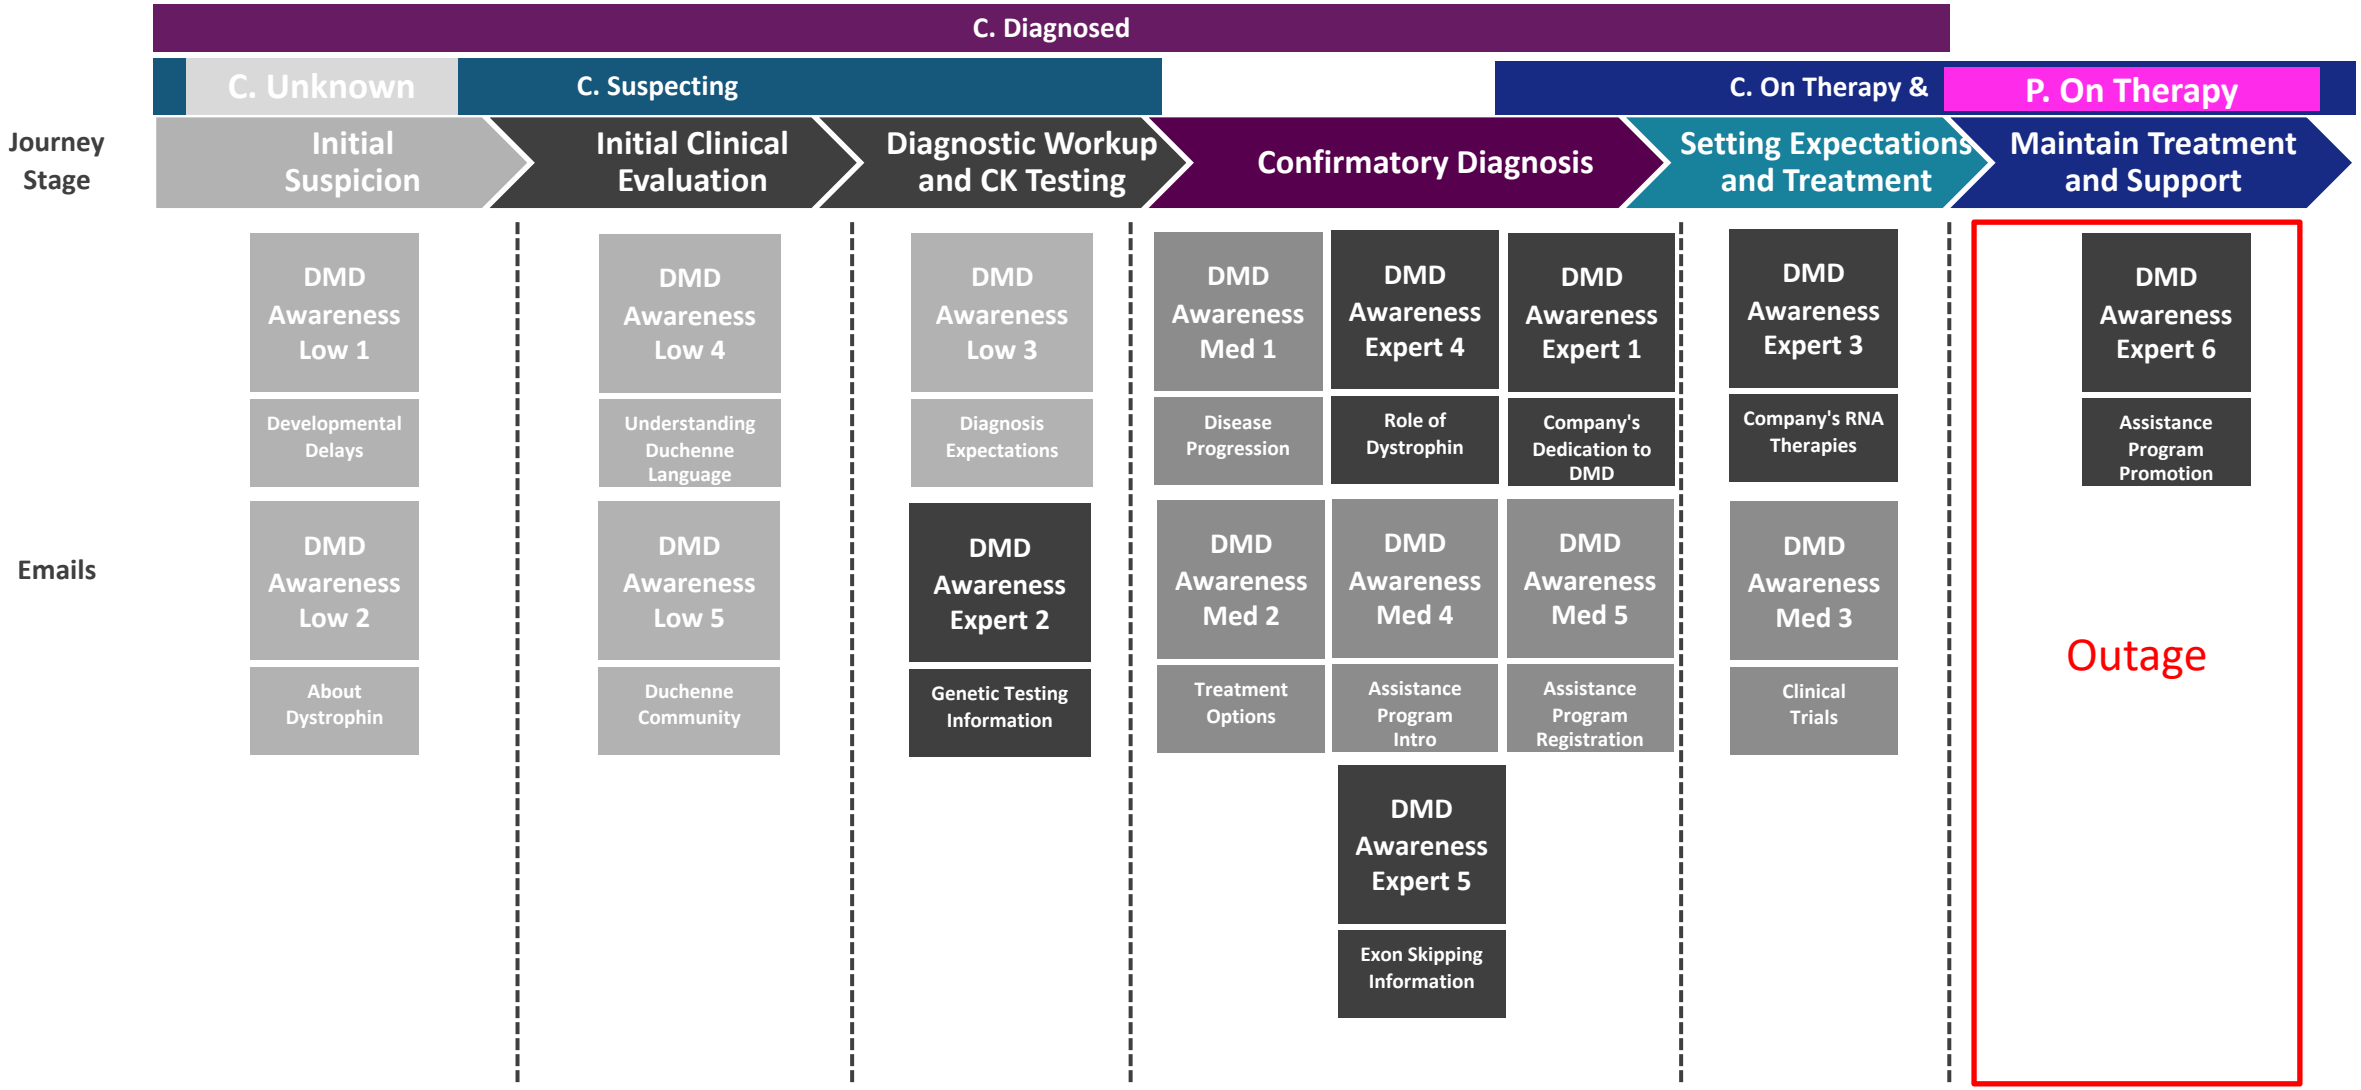
We can now map the existing DMD Awareness Journey emails to the patient journey based on unmet needs and expectations

Most of our existing emails map to the patient journey, however, we do see an outage in Maintain Treatment and Support, this could be an opportunity to drive more conversation around patient forum, non-ambulatory, and perhaps move into branded discussions



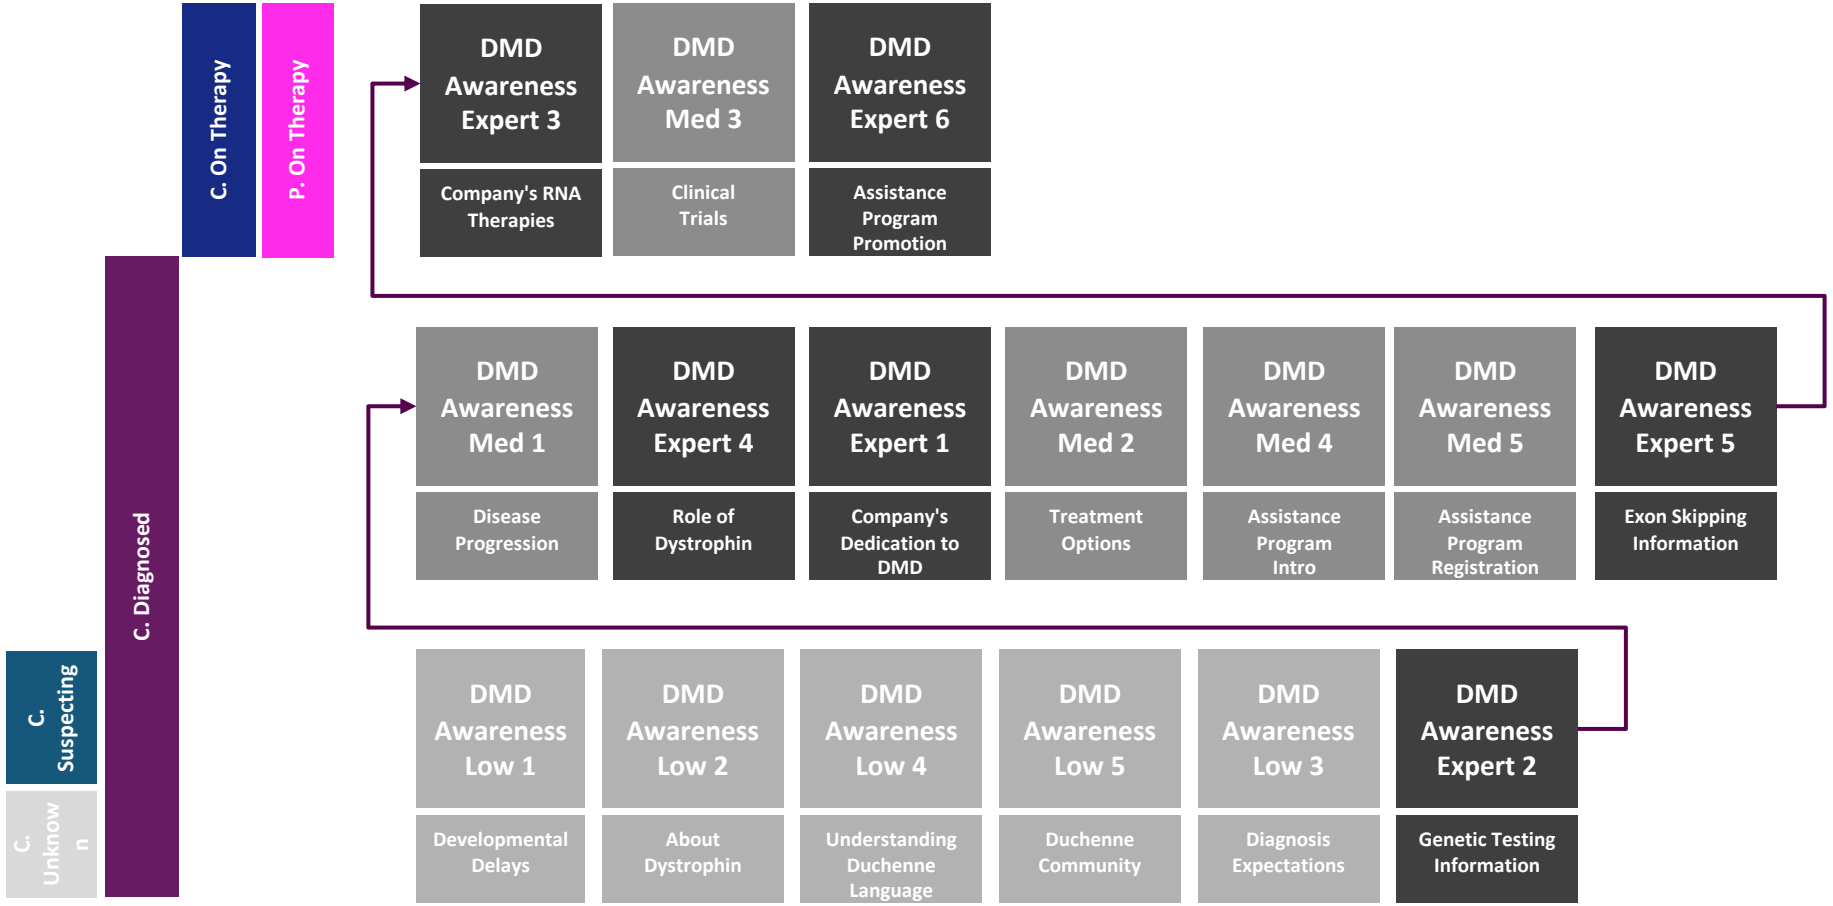
Now, we layer on personas to updated journey to determine new email cadence.

Now we have an idea of how to optimize the existing DMD Awareness Journey to the personas, with starting the C. Diagnosed at the beginning; later gathering input in the form of a survey to ensure the right cadence and if we need to accelerate that particular registrant



Based on the personas and journey, we now have an updated DMD Awareness journey

There is a new cadence based on the needs of each persona by journey stage. Note, we are starting the C. Diagnosed further up in the journey and starting C. Unknown and C. Suspecting at the same place. We'll leverage surveys (in later slides) to determine additional qualification and journey changes

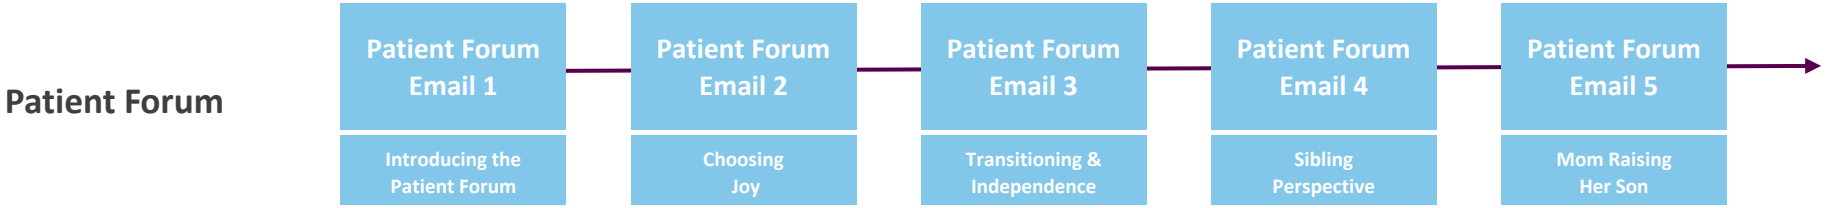


Patient Forum Email Journey

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Existing Patient Forum Journey

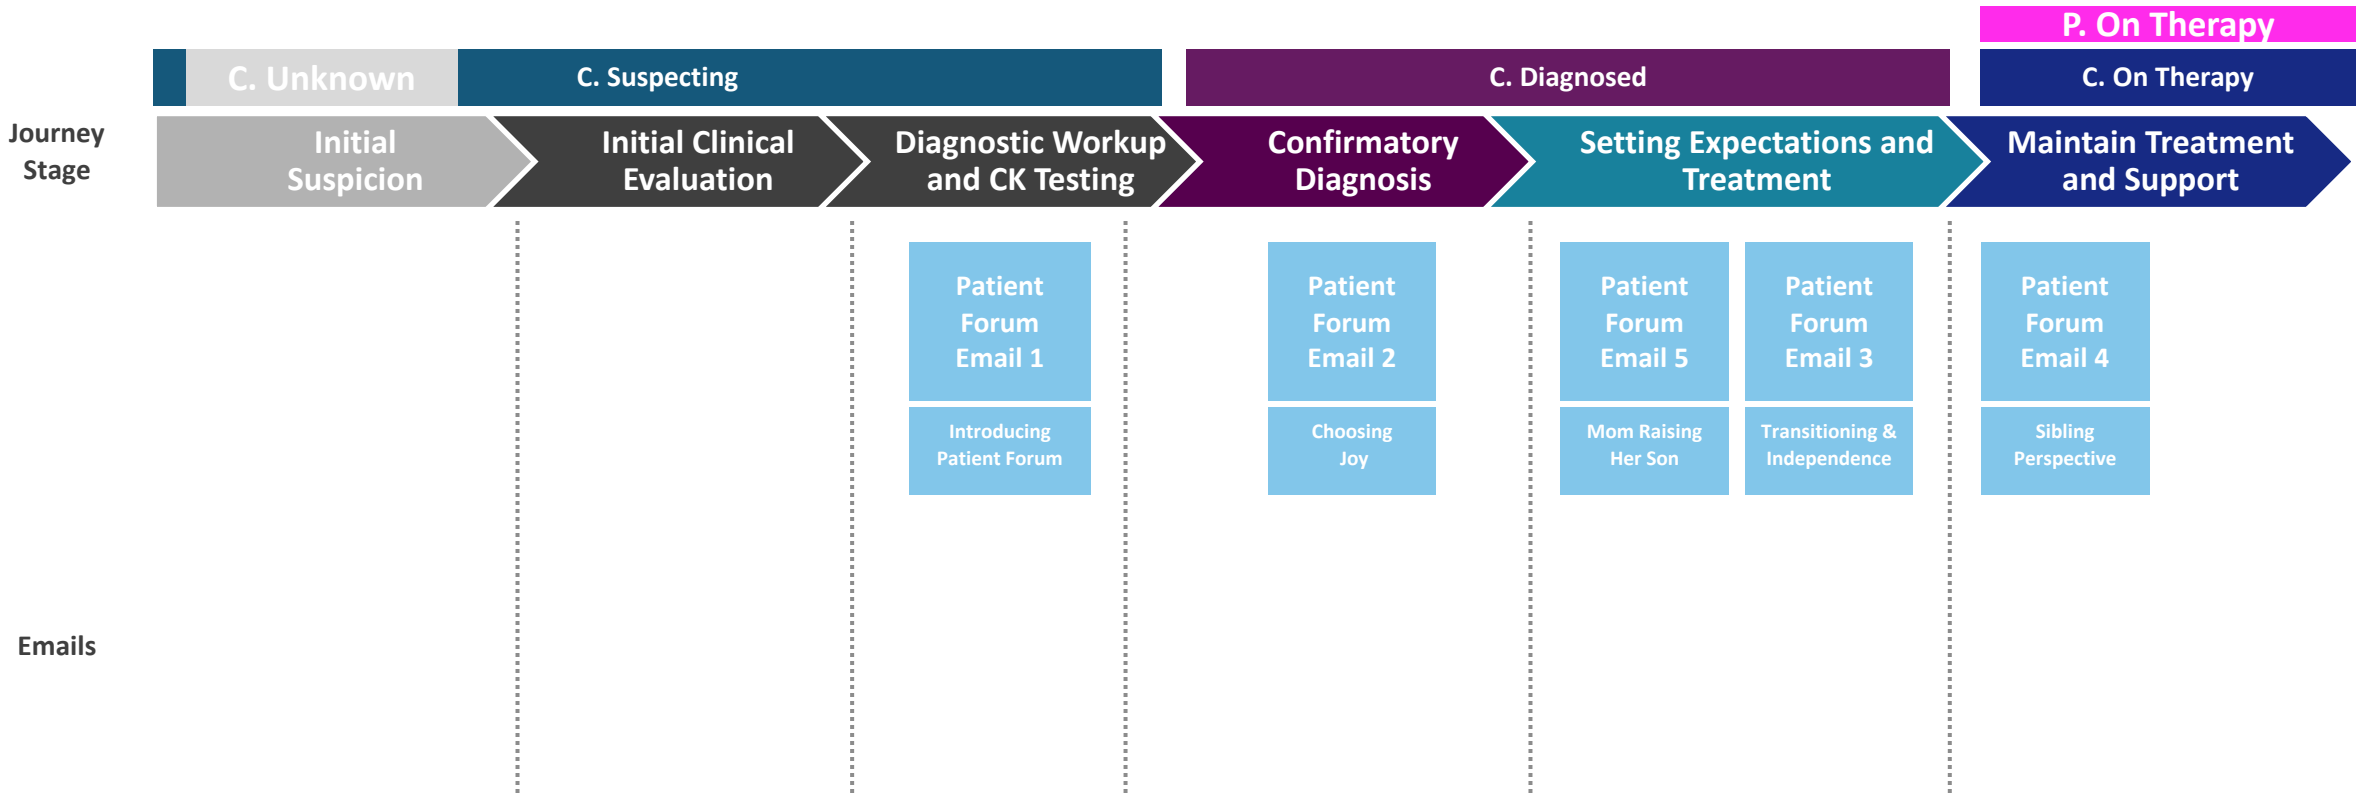
Patient Forum email journey consists of five emails ranging in themes from choosing joy as a caregiver to a sibling perspective



Going deeper into each email to uncover themes and topics that we can leverage to determine/confirm order against the journey

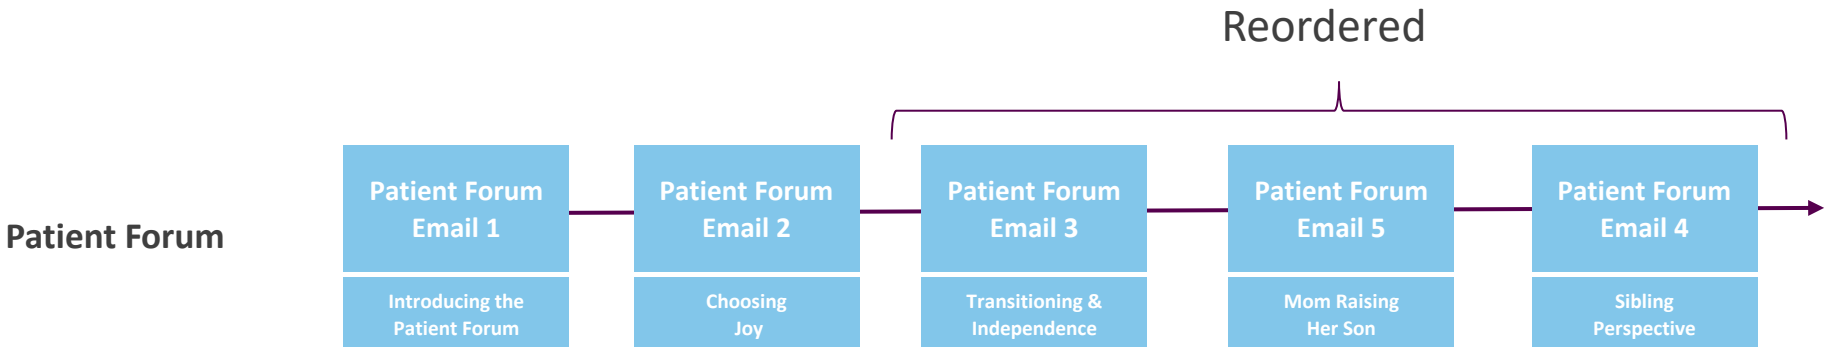
Emails	Patient Forum Email 1	Patient Forum Email 2	Patient Forum Email 3	Patient Forum Email 4	Patient Forum Email 5
Theme	Introducing Patient Forum	Choosing Joy	Transitioning to College Finding Independence	Sibiling Perspective	Mom Raising Her Son
Subject Line	Introducing Patient Forum, designed to support the Duchenne Community	Meet JB – Mother, Duchenne Caregiver & Patient Forum Engager	Meet Diane and Joshua – Mom and Son & Patient Forum Engagers	Meet Katie – Sister, Duchenne Caregiver & Patient Forum Engager	Meet Leeandra – Mom, Duchenne Caregiver & Patient Forum Engager
Topics	Have you heard of the Patient Forum?	Intro to JB	Intro to Diane and Joshua	Intro to Katie	Intro to Leeandra
	What is the Patient Forum	Her Story Includes	Their Stories Include	Her Story Includes	Her Story
	Stories and Engagements Include	Listen To JB's Story	Watch Diane & Joshua's Story	Watch Katie's Story	Find Their Stories Here
	Visit DSA Website	About Patient Forum	About Patient Forum	About Patient Forum	About Patient Forum
	About Patient Forum				

Mapping the Existing Patient Forum Journey Emails to the Patient Journey, introducing the Patient Forum to the suspecting and support during diagnosis



Optimized Patient Forum Journey

Small tweaks to the journey focus on the later stages, 3, 4 and 5

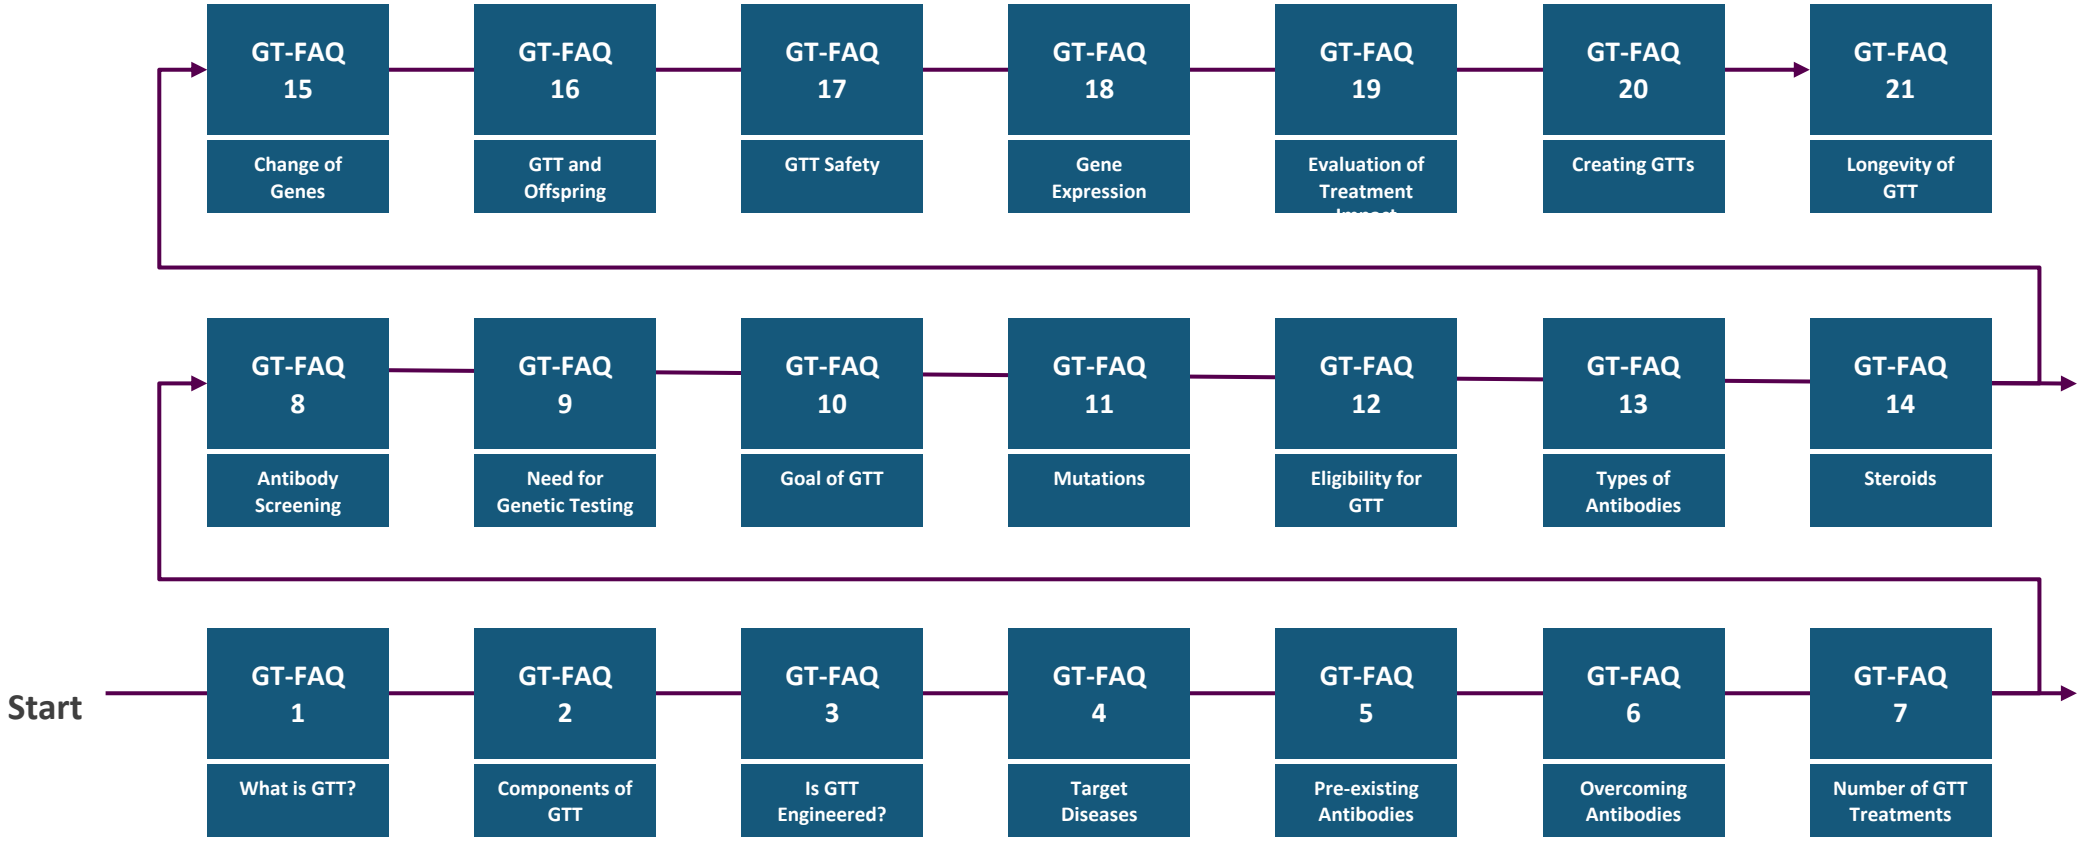


GT-FAQ Email Journey

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Existing GT-FAQ Email Journey

Current state of email journey flow and corresponding content



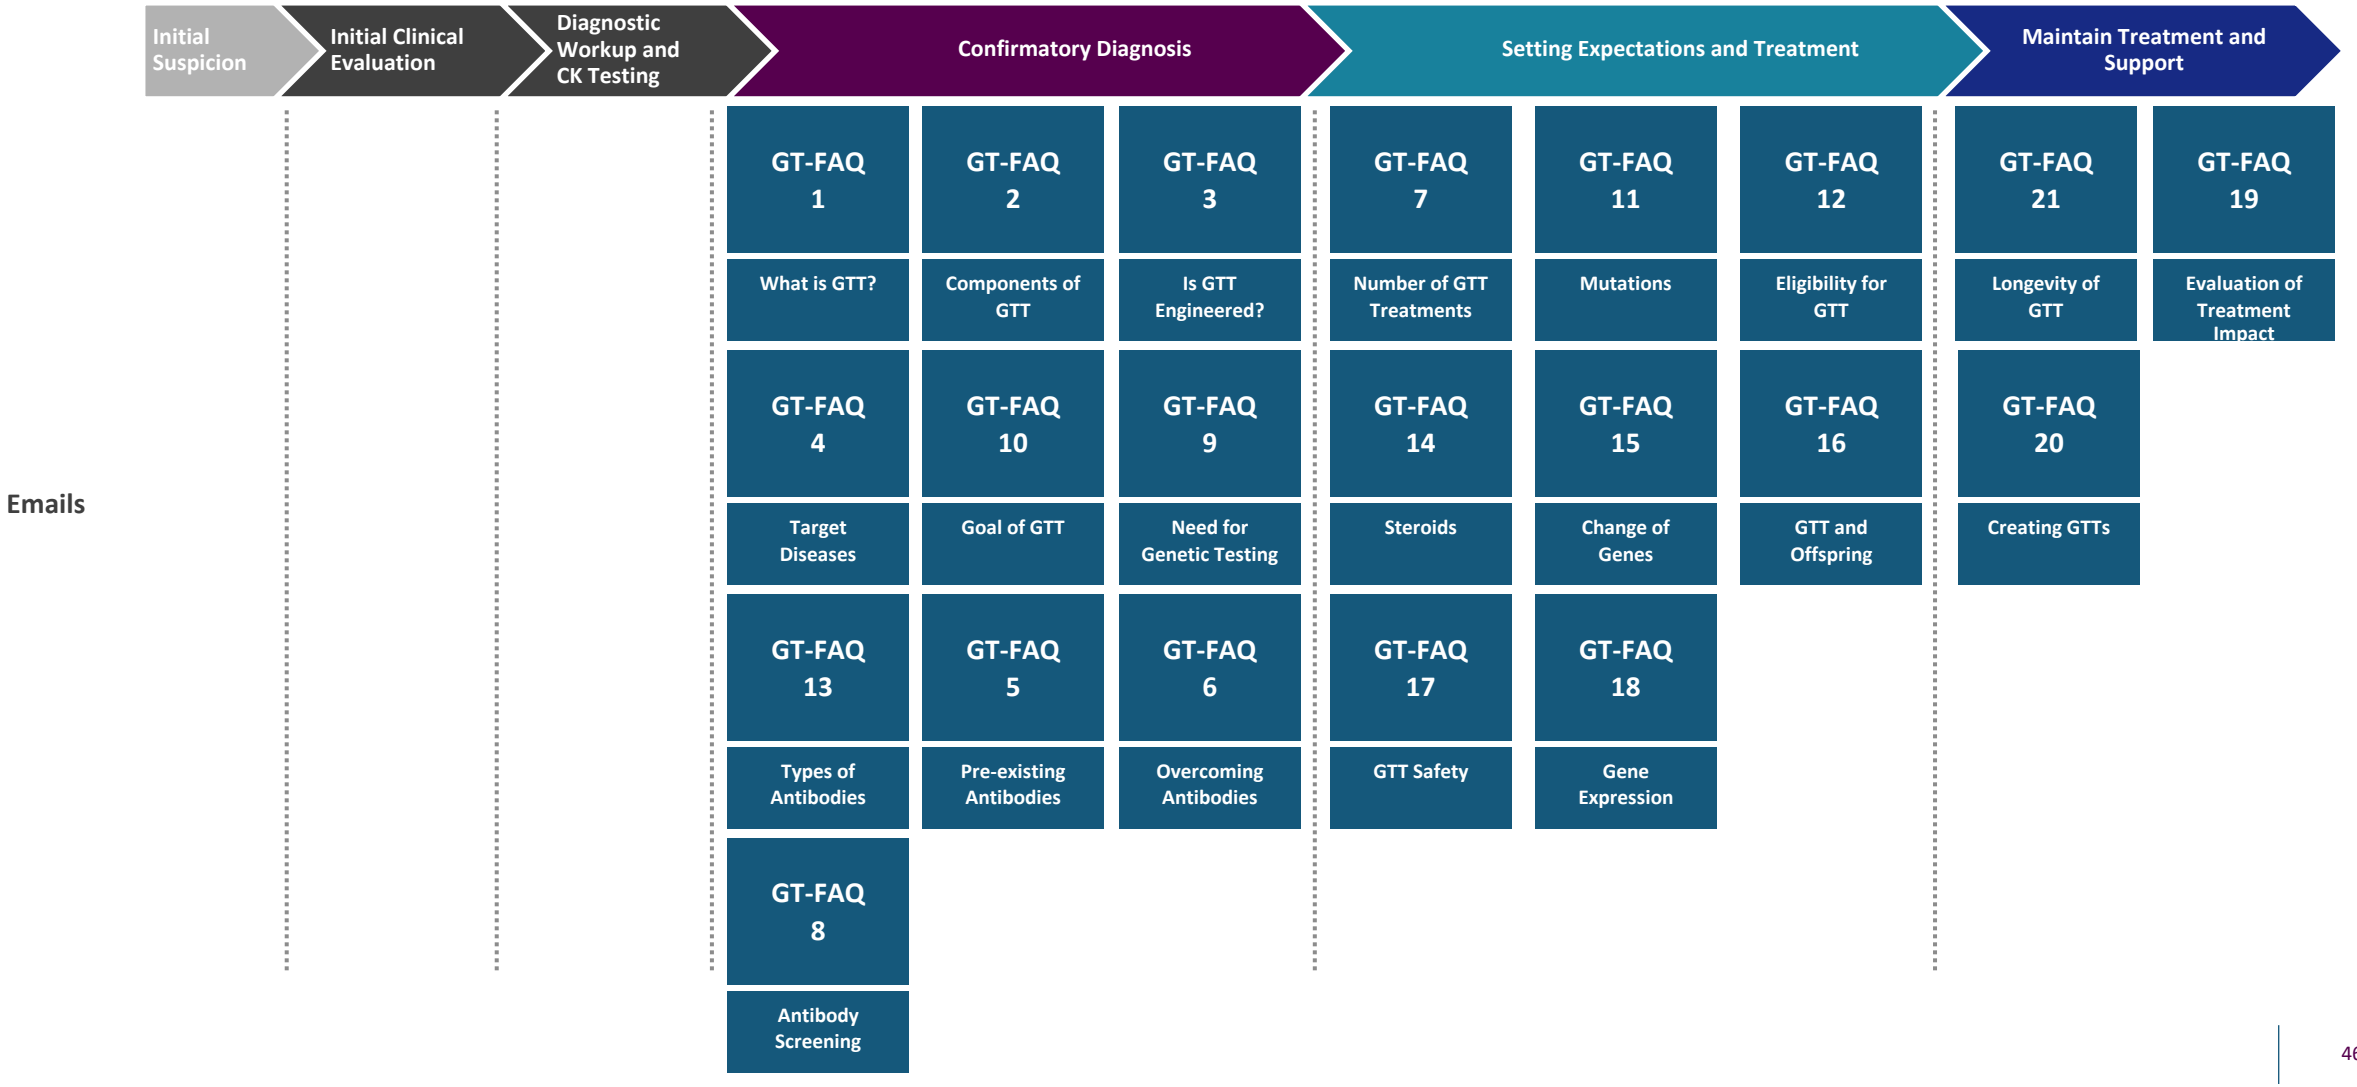
Going deeper into each email to uncover themes and topics to be used in journey analysis. Of note, the GT-FAQ journey assumes a certain level of disease state education exists.

Emails	GT-FAQ Email 1	GT-FAQ Email 2	GT-FAQ Email 3	GT-FAQ Email 4	GT-FAQ Email 5	GT-FAQ Email 6	GT-FAQ Email 7	GT-FAQ Email 8	GT-FAQ Email 9	GT-FAQ Email 10	GT-FAQ Email 11
Theme	What is GTT?	Components of GTT	Is GTT Engineered?	Target Diseases	Pre-existing Antibodies	Overcoming Antibodies	Number of GTT Treatments	Antibody Screening	Need for Genetic Testing	Goal of GTT	Mutations
Subject Line	**What is Gene Transfer Therapy?**	**What are essential components of Gene Transfer Therapy?**	**Why do people say that Gene therapy is engineered?**	**What types of diseases could gene therapy test?**	**What are pre-existing antibodies and why they matter for Gene Therapy?**	**Overcoming antibodies**	**Can you receive gene therapy more than once?**	**Is there a universal test that screens for antibodies in gene therapy?**	**Is genetic testing required for gene therapy?**	**What is the goal of gene transfer therapy?**	**Is gene therapy specific to a mutation?**
Email Topics	What does "gene transfer therapy" mean?	The components of gene therapy (vector, promoter, transgene)	Why the components of Gene Therapy are important	What makes a disease a potential candidate and why scientists need to understand if gene mutation is causing disease.	How and why antibodies remain in the body and the non-disease-causing vectors doctors use to deliver gene therapy	What it means to have pre-existing antibodies to the vector	Why gene therapy is a one-time treatment	How gene therapies have vectors so there is not one universal antibody test. (each test specific to the therapy)	Why you need testing and how to speak to your doctor to get no-cost testing	Why gene therapy is intended to slow or stabilize disease.	Why gene therapy is not specific to mutation and how it is used to treat genetic disease to address a missing protein.
	How and why gene transfer is used to deliver a new version of a gene to make a protein	Why gene therapy is unique	The considerations made when choosing a vector and why scientists keep transgene on in intended cells	How they are investigating gene therapy to restore protein expression	Why it is important to test for pre-existing antibodies to a gene therapy vector	Why body mounts a defense to PE antibodies	How the body mounts a defense to therapy once it has been exposed to a certain vector	Testing for pre-existing antibodies are based on scientist thresh holds and definitions		The role of each gene therapy components and how these components work together to make new protein	The imperative need for a definitive genetic test to be eligible for gene therapy.

Emails	GT-FAQ Email 12	GT-FAQ Email 13	GT-FAQ Email 14	GT-FAQ Email 15	GT-FAQ Email 16	GT-FAQ Email 17	GT-FAQ Email 18	GT-FAQ Email 19	GT-FAQ Email 20	GT-FAQ Email 21
Theme	Eligibility for GTT	Types of Antibodies	Steroids	Change of Genes	GTT and Offspring	GTT Safety	Gene Expression	Eval. Of Treatment Impact	Creating GTTs	Longevity of GTT
Subject Line	**What are eligibility criteria for gene therapy clinical trials?**	**If I have antibodies to one type of AAV, am I immune to other types?**	**Why are steroids used in gene therapy clinical trials?**	**Does gene transfer therapy change a person's genes?**	**Could gene transfer therapy affect a person's offspring?**	**How is safety measured in a gene therapy clinical trial?**	**How is Gene expression evaluated in gene therapy clinical trials?**	**How is a treatment's impact on a disease evaluated in a gene therapy clinical trial?**	**How are gene transfer therapies made?**	**How long is gene therapy expected to last?**
Email Topics	How and why trials are used to assess safety of treatment.	Why AAV vectors are used as a delivery vehicle (with examples)	The steroid routine	Defining DNA and its role in genetic diseases	Role of transgene and its relations to a person's natural DNA	How safety is assessed and the questions you will be asked.	The role of a transgene in making the intended protein in the cell and the steps taken to measure protein	How scientists know if gene therapy is working and how therapy is evaluated for neuromuscular disease.	The complex process that goes into making a single batch of gene therapy	Why gene therapies are a one-time treatment and what doctors are doing to understand long term value.
	Communicating eligibility criteria and why it is important.	Why you need to get tested for pre-existing antibodies to a specific vector	Why steroids are needed to keep the body from mounting a response to the gene therapy.	How gene therapy operates and its separate relationship to DNA	Why muscle cells are an exciting target for gene therapy	Why it is important to monitor adverse events in trials.	What scientists need to see to confirm gene therapy is working.	Definition of clinical trial endpoints and how they are determined.		How and why scientists assess clinical measures in gene therapy

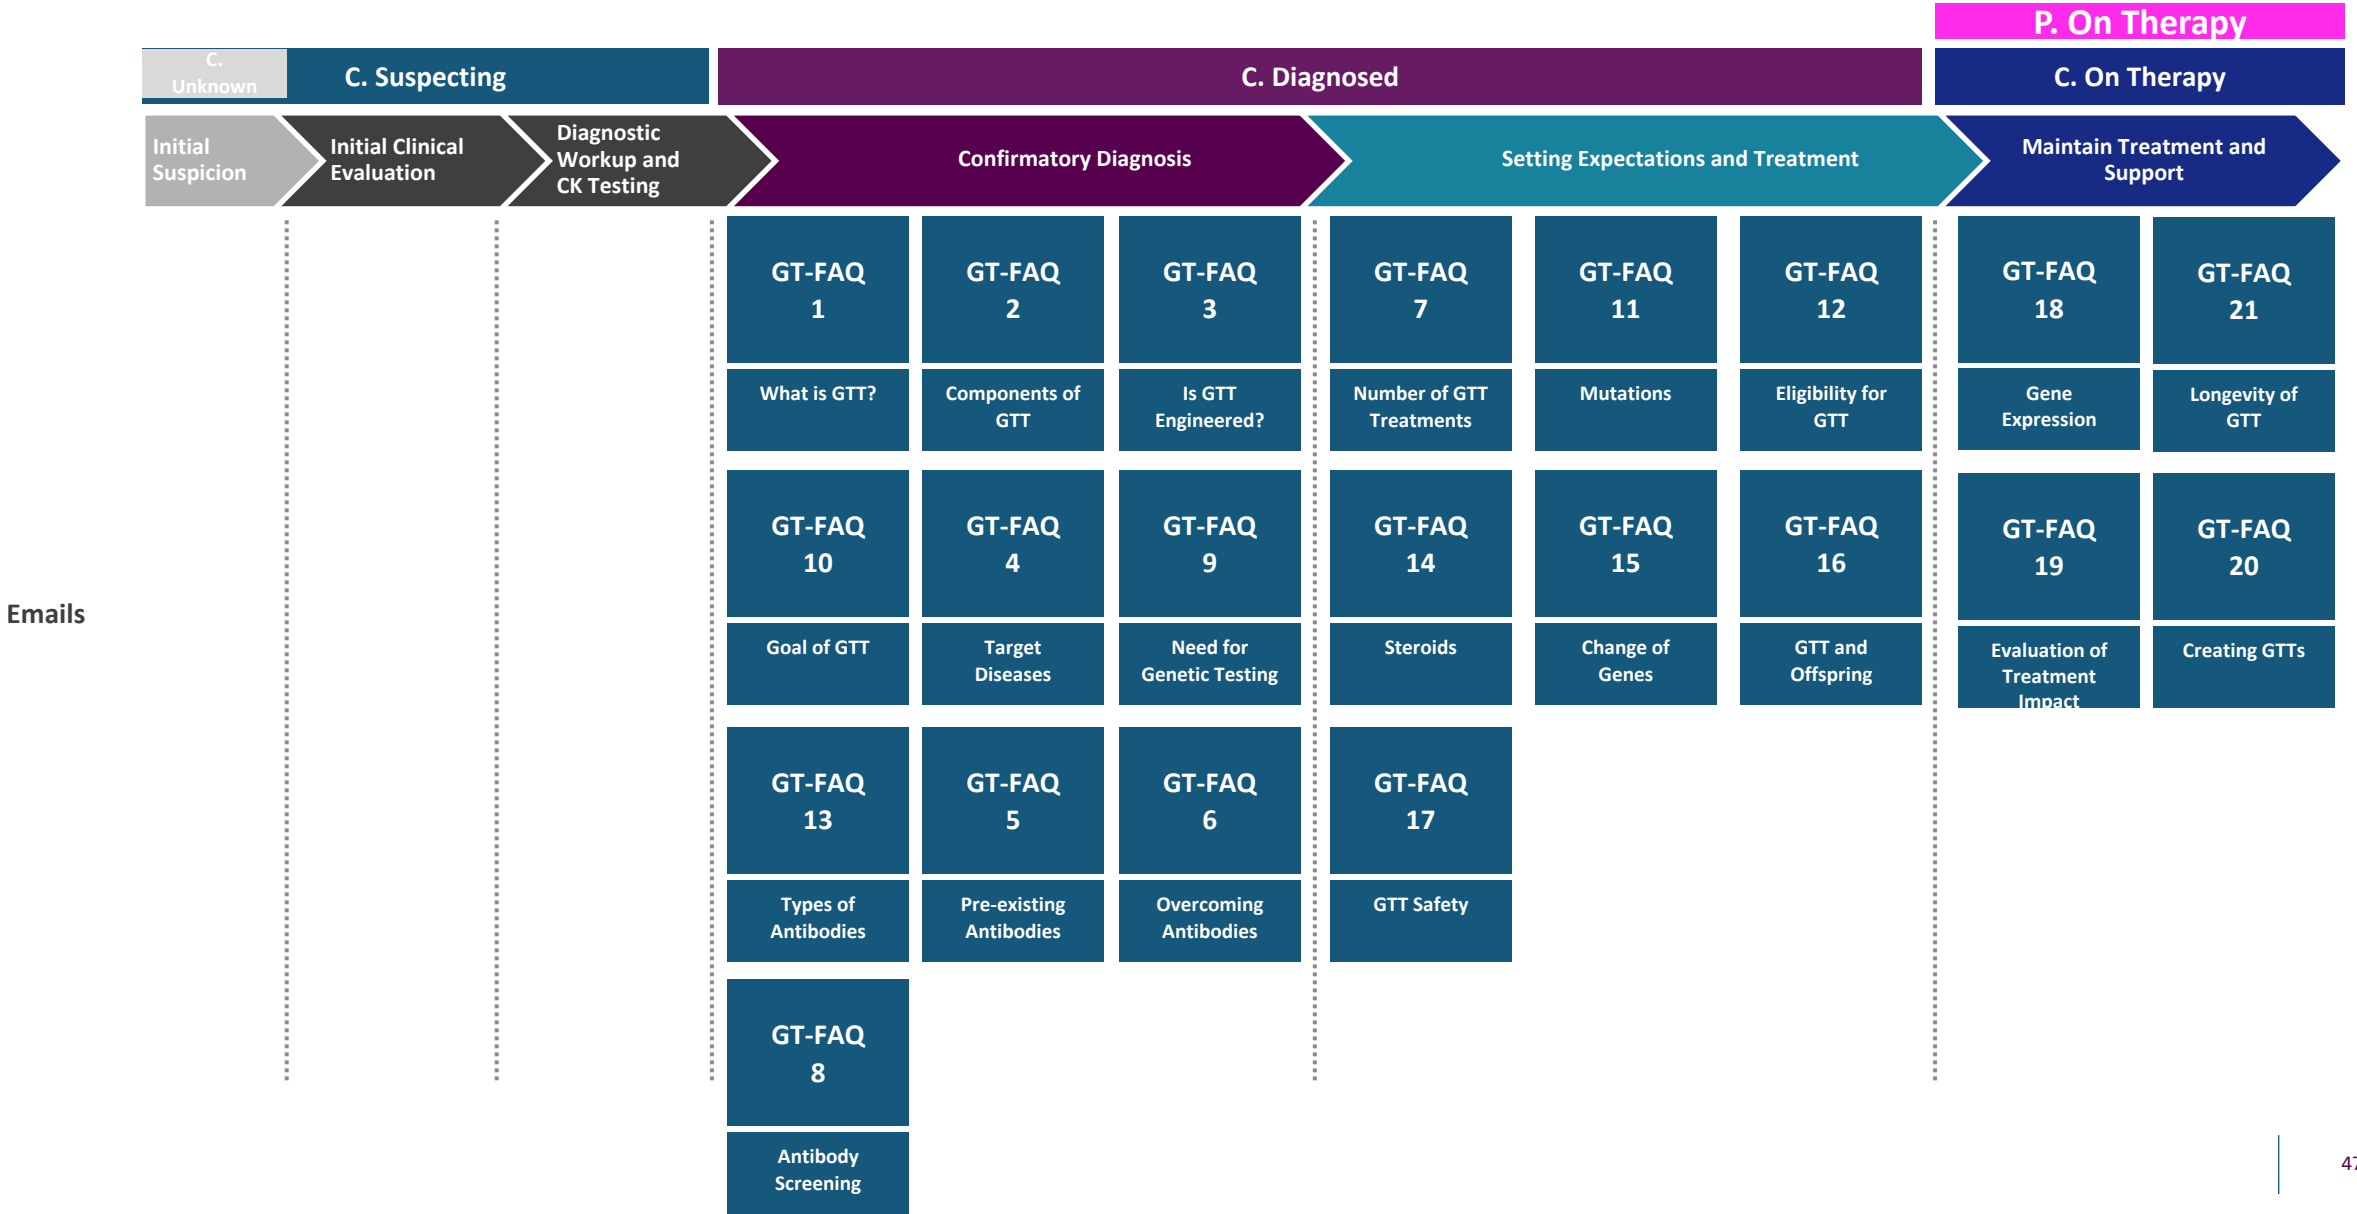
We can now map the existing GT-FAQ Journey emails to the patient journey based on unmet needs and expectations

Since the GT-FAQ email journey takes into account an existing DMD diagnosis and baseline knowledge of disease state, the genesis of the journey starts with confirmatory diagnosis



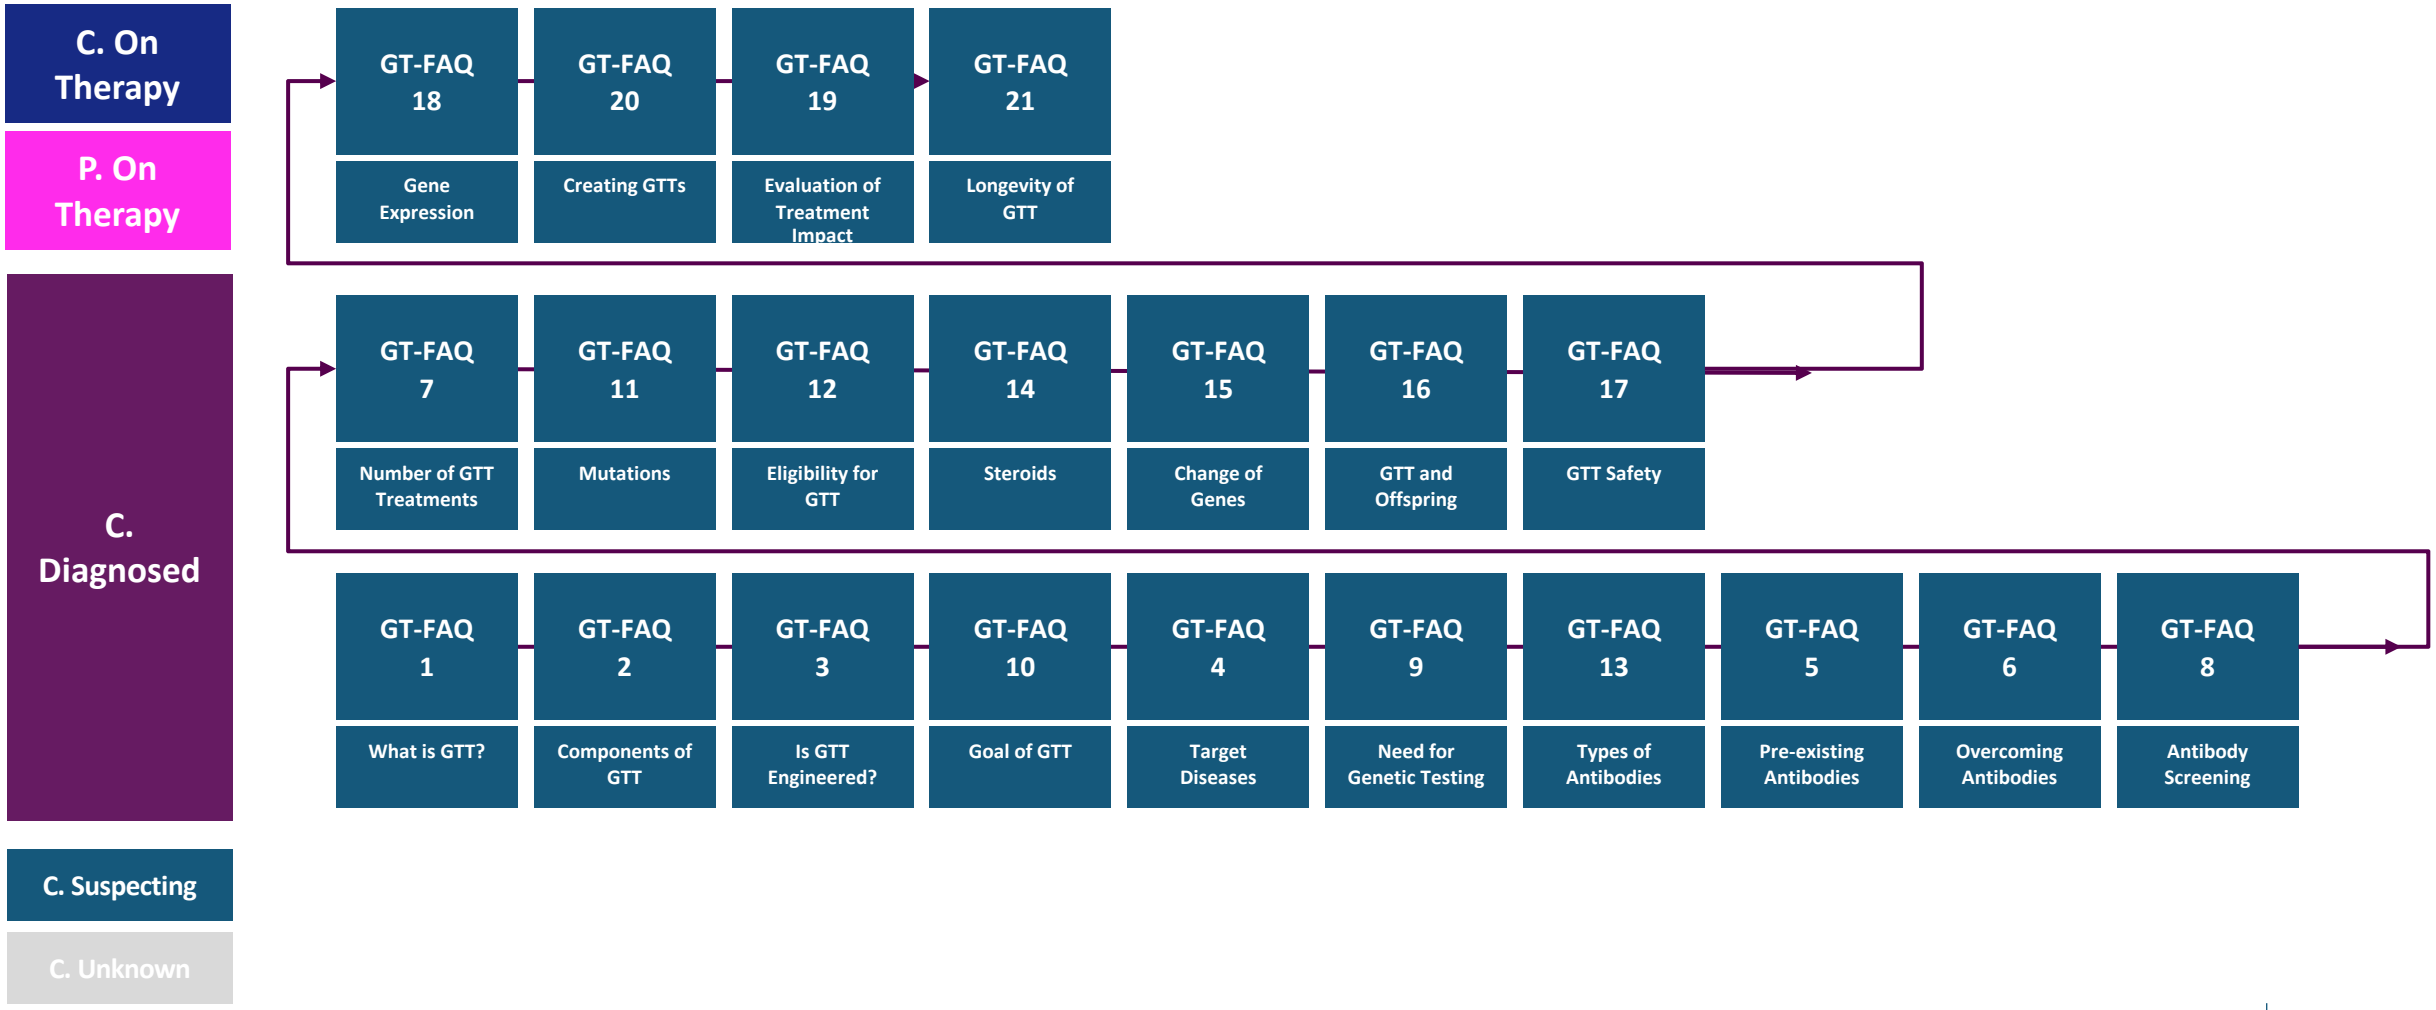
Layering on personas to updated journey to determine new email cadence

The GT-FAQ journey is primarily focused on those who have a confirmed diagnosis; the journey begins with C. Diagnosed personas



Based on the personas and journey, we now have an GT-FAQ journey

There is a new cadence based on the needs of each persona by journey stage, along with a new need for welcome emails



Combining Email Journeys to determine order and cadence

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Mapping the emails against the journey. We will also start the C. Diagnosed at the beginning; later gathering input in the form of a survey to determine cadence

C. Diagnosed

C. Unknown | C. Suspecting | C. On Therapy & P. On Therapy

Journey Stage	Initial Suspicion	Initial Clinical Evaluation	Diagnostic Workup and CK Testing	Confirmatory Diagnosis		Setting Expectations and Treatment		Maintain Treatment and Support	
Emails	DMD Awareness Low 1	DMD Awareness Low 4	DMD Awareness Low 3	DMD Awareness Med 1	DMD Awareness Expert 4	Patient Forum Email 1	DMD Awareness Expert 3	DMD Awareness Expert 6	Patient Forum Email 3
	Developmental Delays	Understanding Duchenne Language	Diagnosis Expectations	Disease Progression	Role of Dystrophin	Introducing Patient Forum	Company's RNA Therapies	Patient Assistance Promotion	Transitioning & Independence

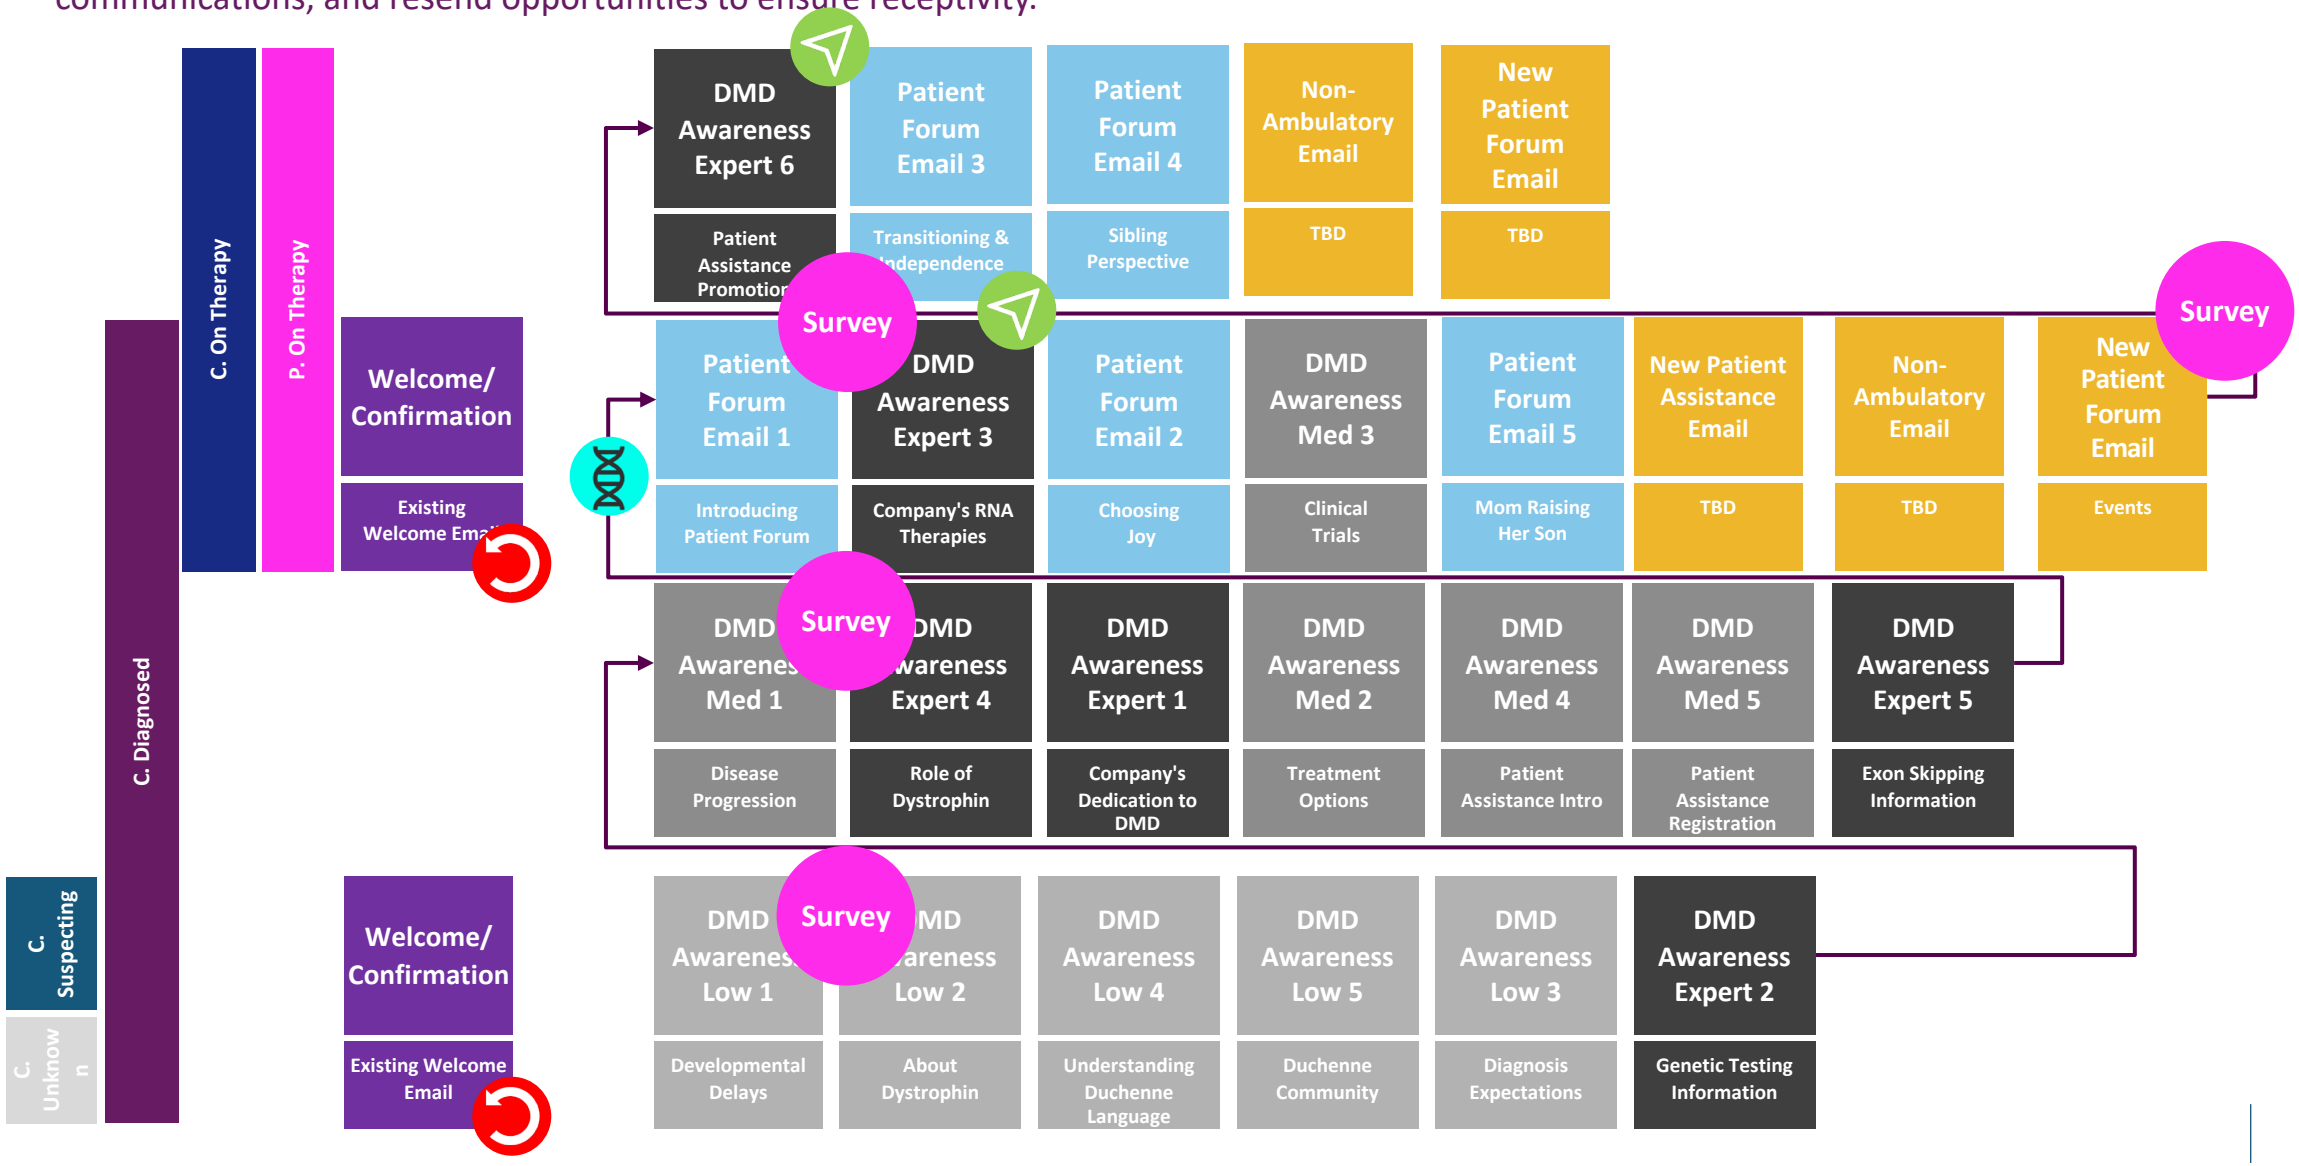
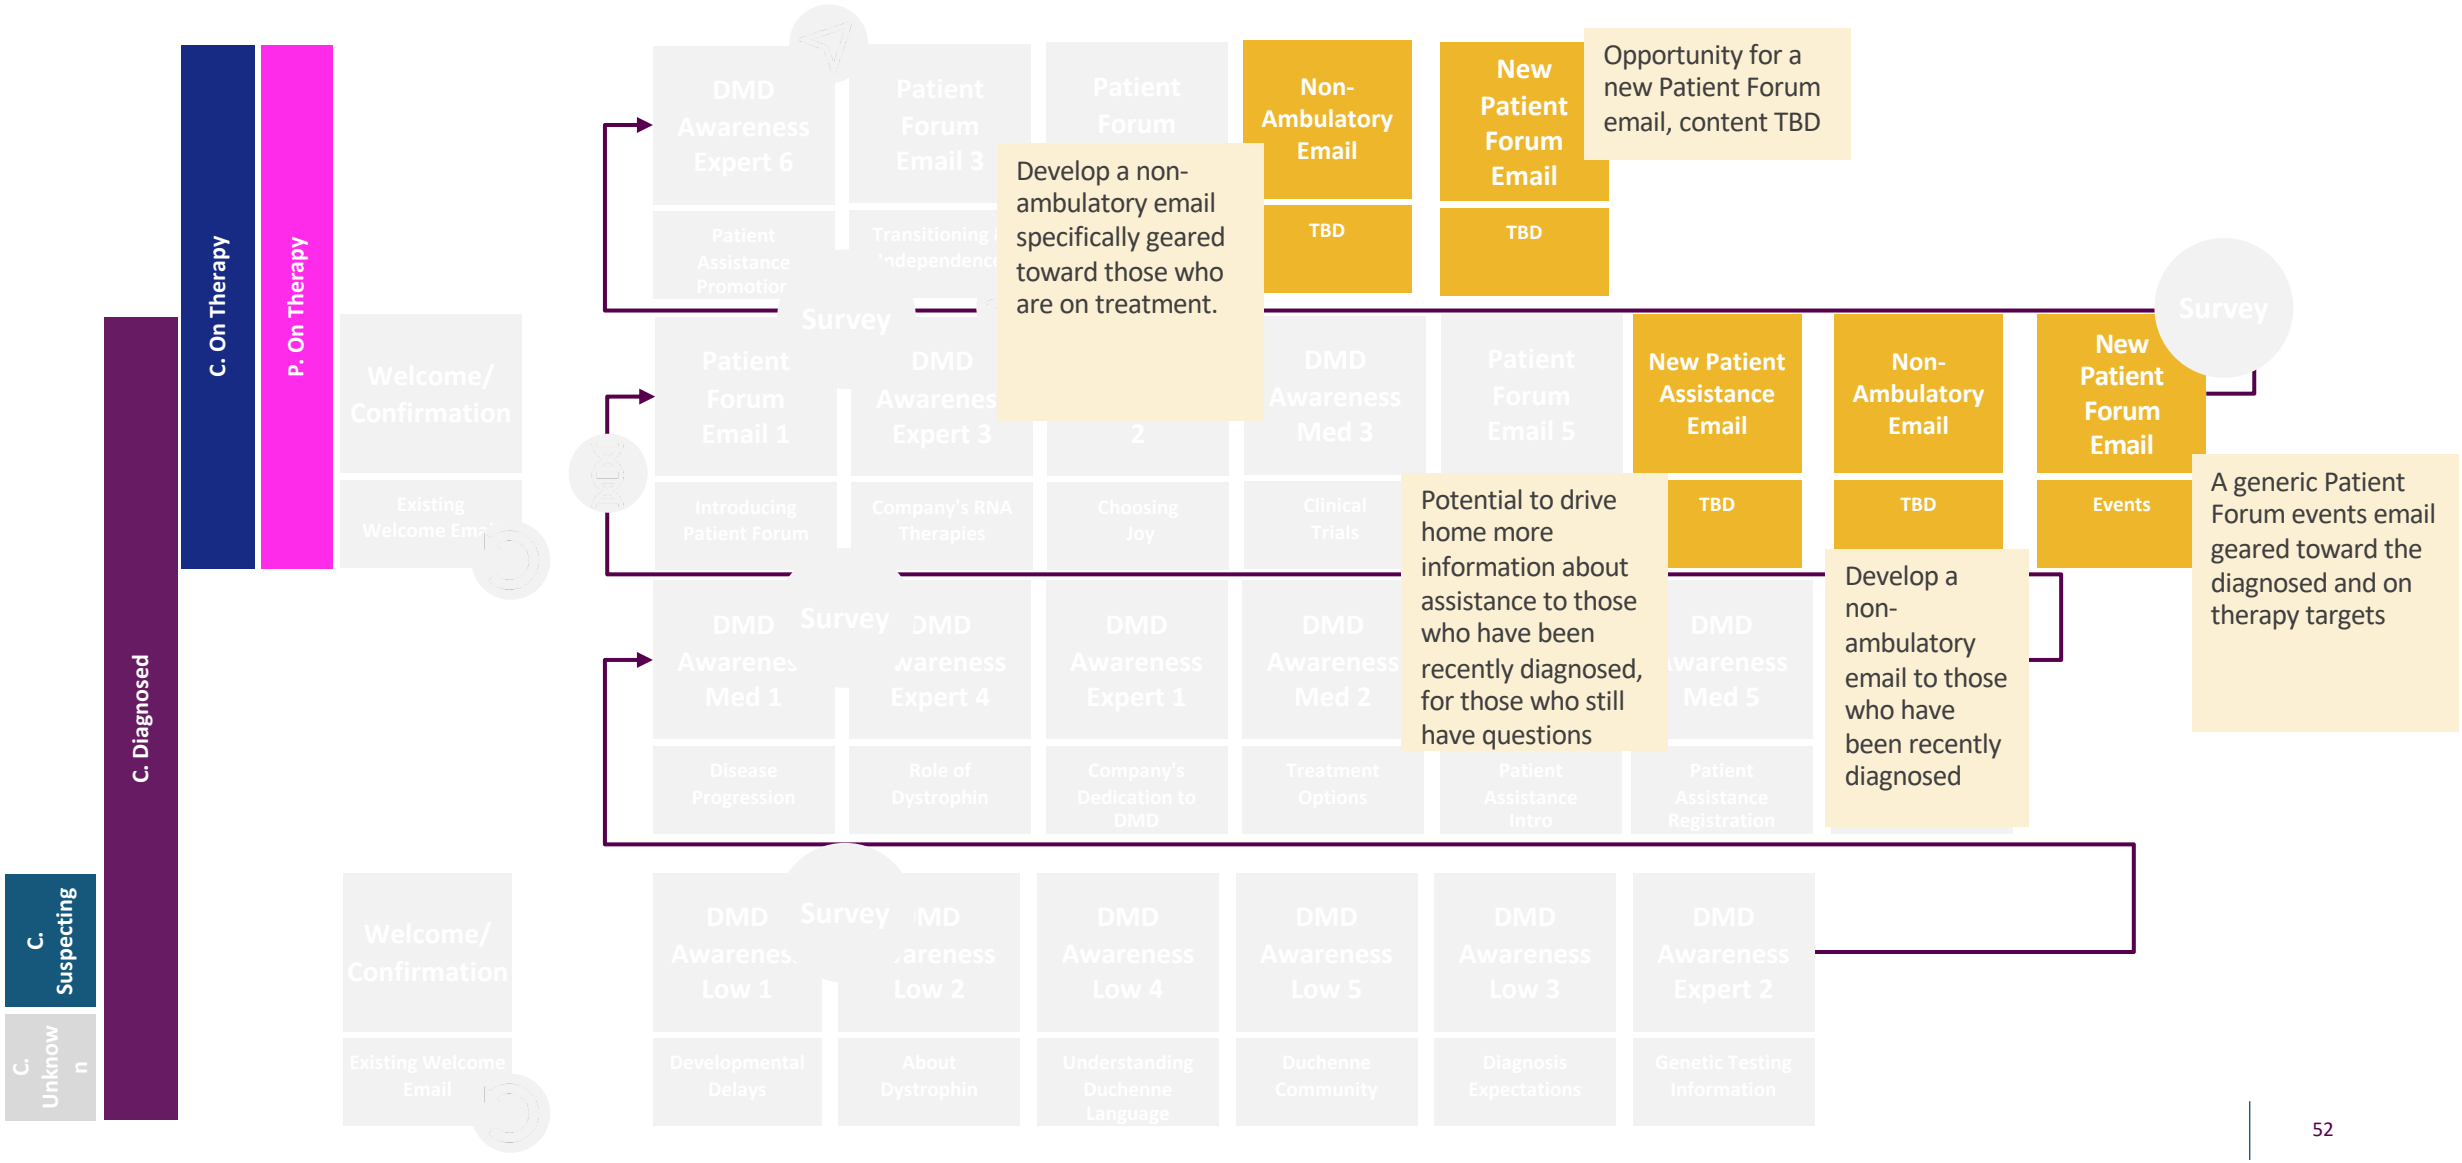
Updated Caregiver/Patient Journey

Viewing the complete email journey and cadence with areas designated for surveys, outflow to branded communications, and resend opportunities to ensure receptivity.



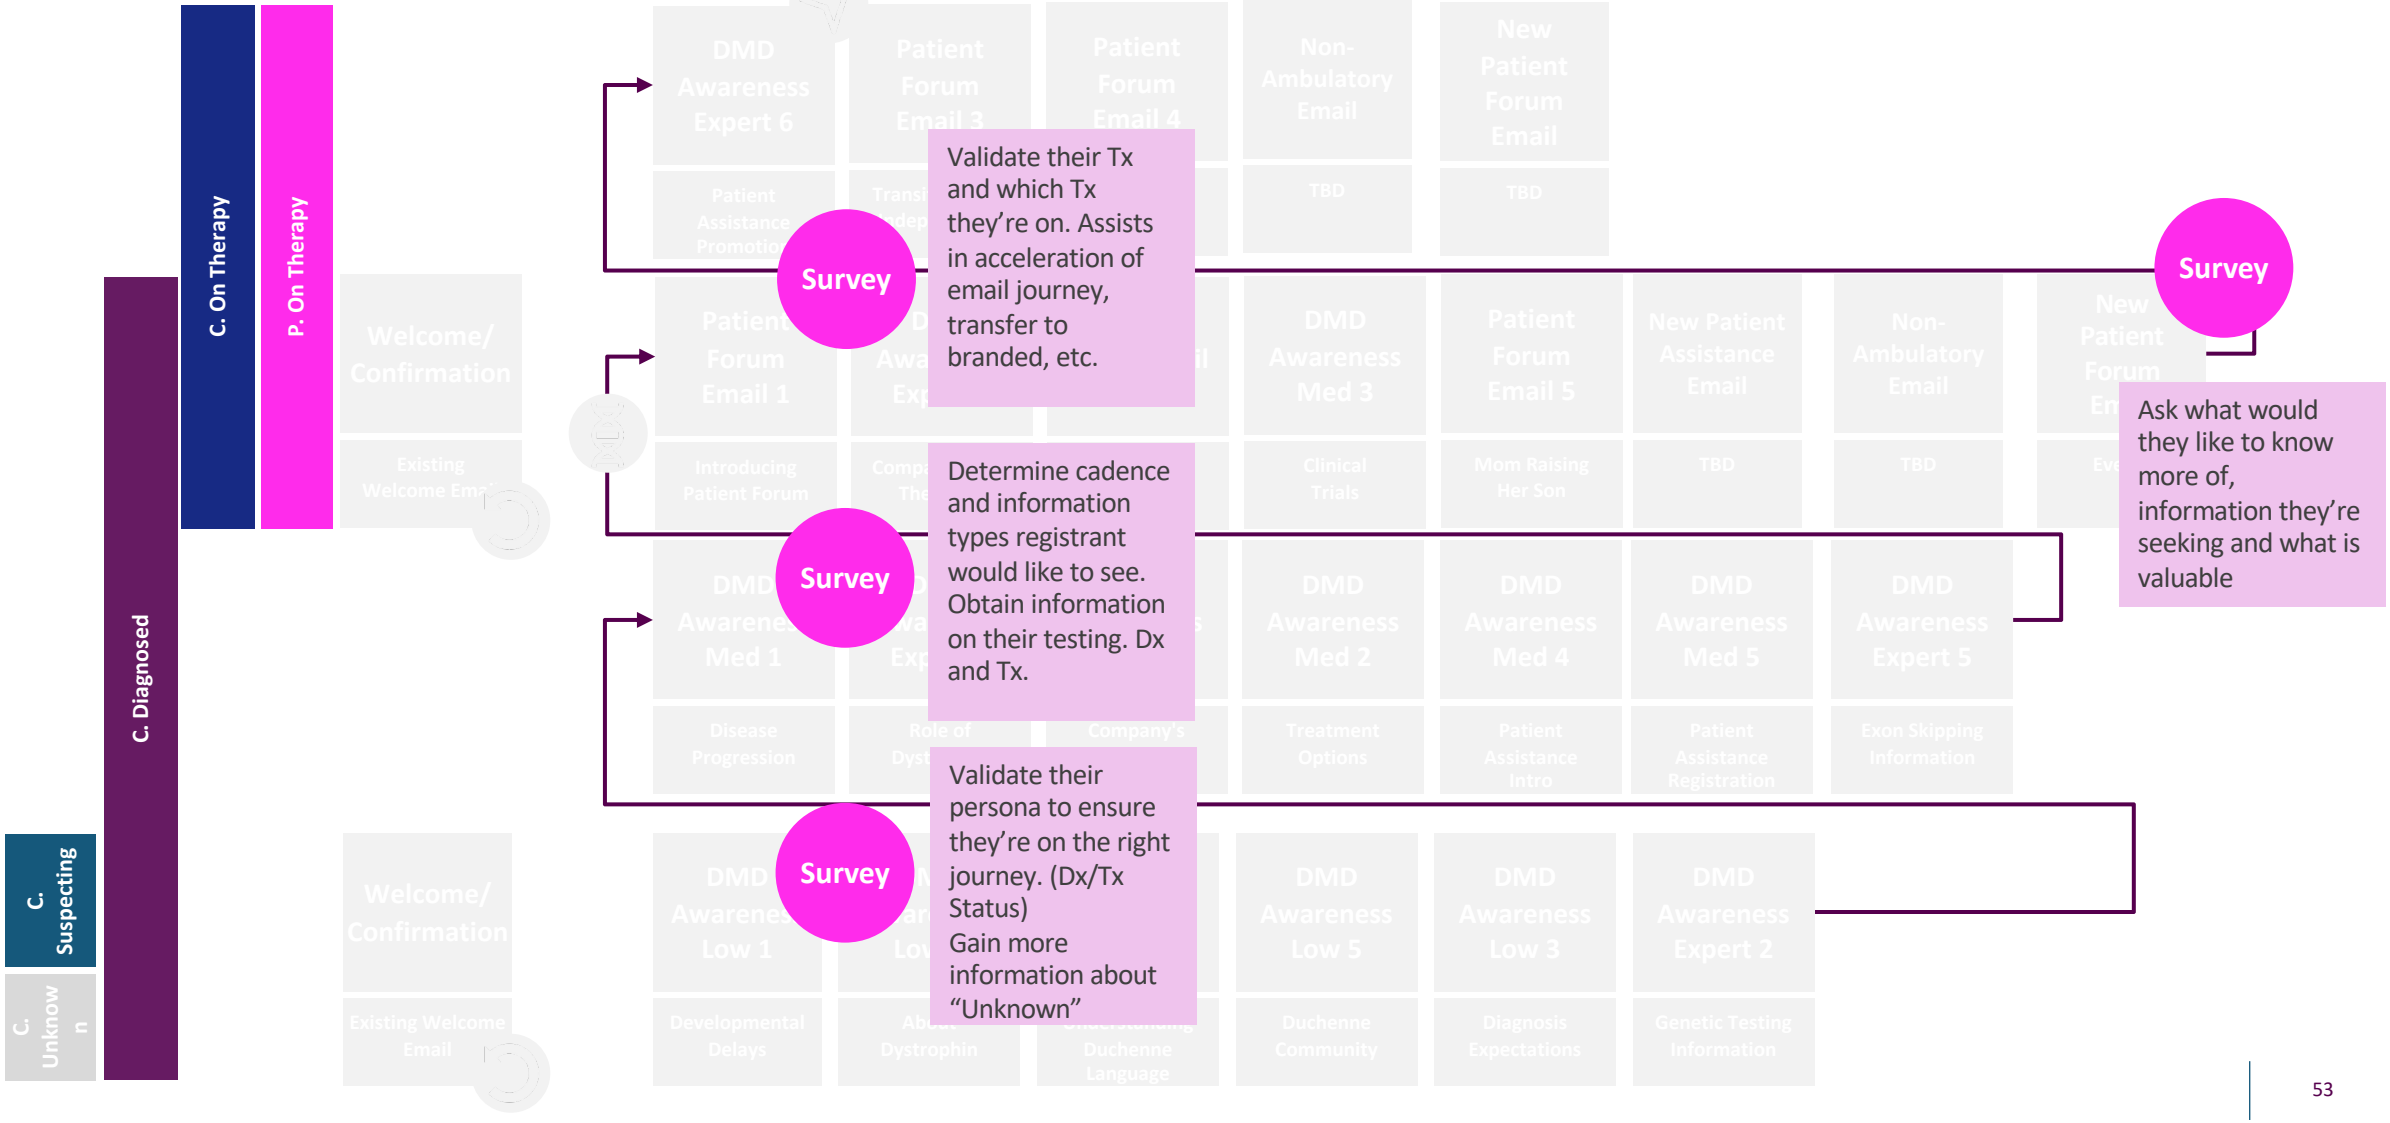
New Email Recommendations

Given the new email structure, we recommend developing non-ambulatory emails and new Patient Forum Emails



Distributing surveys ensures constant learnings of our caregivers and patients

Each survey will serve a primary role from validation, to Dx status to Tx status and current therapy, along with ensuring they're qualified for the next stage/persona



Determining Objectives and KPIs of Individual Stages and Emails

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Review of Our CRM Objectives – Caregivers/Patients

Lead DMD Caregivers/Patients through the customer journey from unbranded to branded content.

Journey Stage	**Initial Suspicion**	**Initial Clinical Evaluation**	**Diagnostic Workup and CK Testing**	**Confirmatory Diagnosis**	**Setting Expectations and Treatment**	**Maintain Treatment and Support**
Caregiver State	Caregivers of potentially **undiagnosed** DMD patients			Caregivers of **newly diagnosed** DMD patients who are RNA treatment eligible	Caregivers of those **considering treatment** options, including RNA therapy	Caregivers of those **on treatment.** Those looking for general **disease support**
Unmet Need	Understanding of what a neuromuscular disorder is, what is involved in diagnosing, and how communicate with pediatrician about red flags, and testing.			Understanding of Duchenne, the role of genetics and the urgency to treat	How to speak with specialists, what is the treatment journey, therapy options and support	Community support, reimbursement assistance, treatment requirements and additional resources for the child
CRM Objectives	**1** Drive awareness of the signs and symptoms of Duchenne	**2** Expand the understanding of early intervention and its importance		**3** Increase awareness of therapy options for the ambulatory and non-ambulatory populations	**4** Establish confidence in discussing DMD and advocating for their child **5** Drive engagement with support resources and the community	**6** Generate awareness of Patient Assistance and the process of starting and staying on therapy

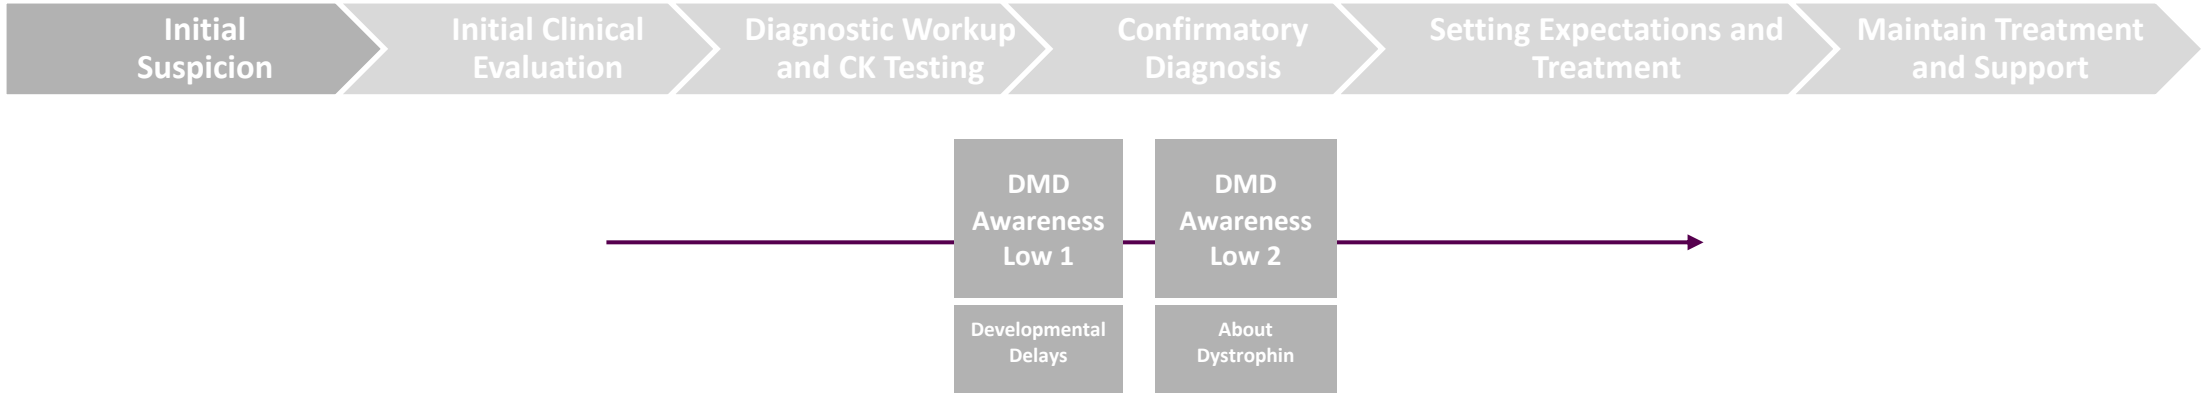
C. Unknown and C. Suspicious Email Objectives and KPIs based on Patient Journey

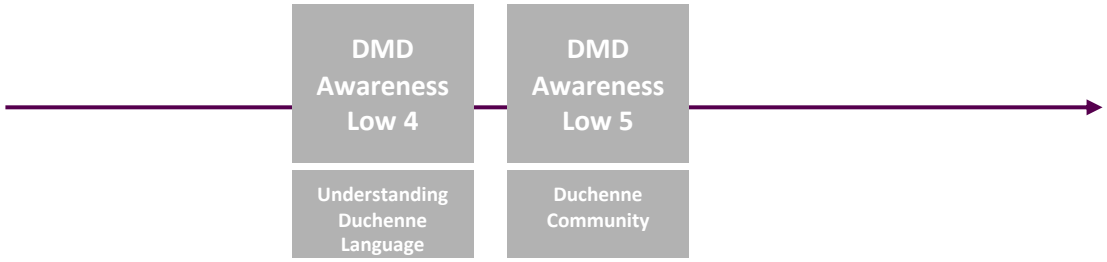
CONFIDENTIAL. FOR INTERNAL USE ONLY.

Initial Suspicion Journey Stage Objectives and KPIs



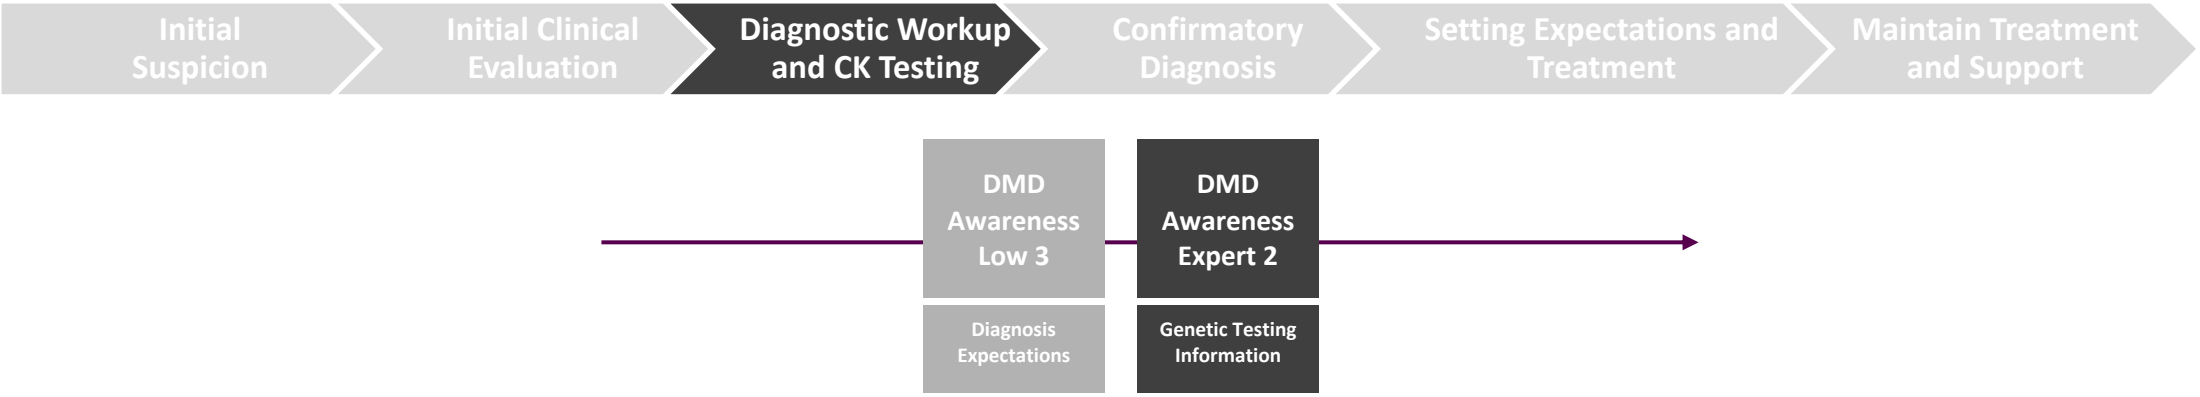
Objective 1: Drive awareness of the signs and symptoms of Duchenne; Prompt Testing			
KPI 1			
Engagement with “About Duchenne” web page on Duchenne.com			

Initial Clinical Evaluation Journey Stage Objectives and KPIs



Objective 1: Drive awareness of the signs and symptoms of Duchenne; Prompt Testing			
KPI 1	KPI 2		
Engagement with “About Duchenne” web page on Duchenne.com	Engagement with the “Diagnosing Duchenne” page on Duchenne.com		

Diagnostic Workup and CK Testing Journey Stage Objectives and KPIs

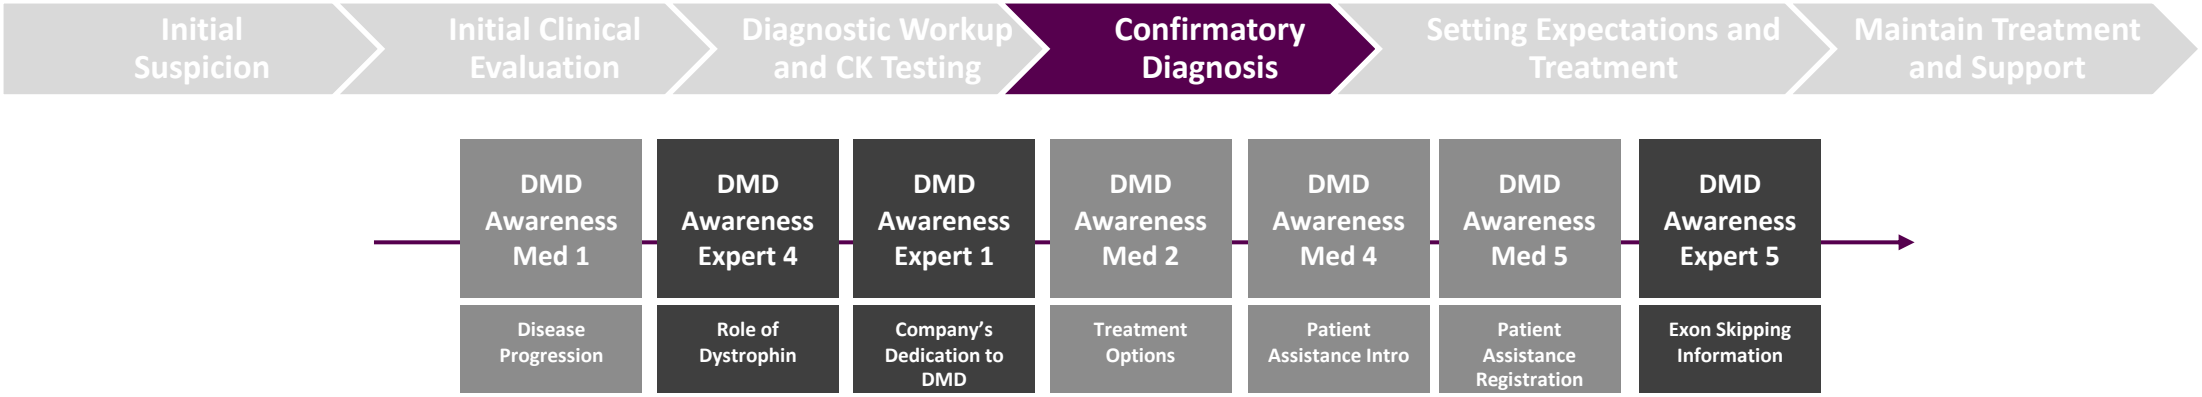


Objective 1: Drive awareness of the signs and symptoms of Duchenne; Prompt Testing			
KPI 1	KPI 2		
Engagement with “About Duchenne” web page on the DSA website	Engagement with the “Diagnosing Duchenne” page on the DSA website		
Objective 2: Expand the understanding of early intervention and its importance			
KPI 1	**KPI 2**	**KPI 3**	
Engagement with the “Diagnosing Duchenne” page on the DSA website	Engagement with the “The Role of Genetics” web page on the DSA website	Engagement with Patient Assistance Program	

C. Diagnosed Email Objectives and KPIs based on Patient Journey

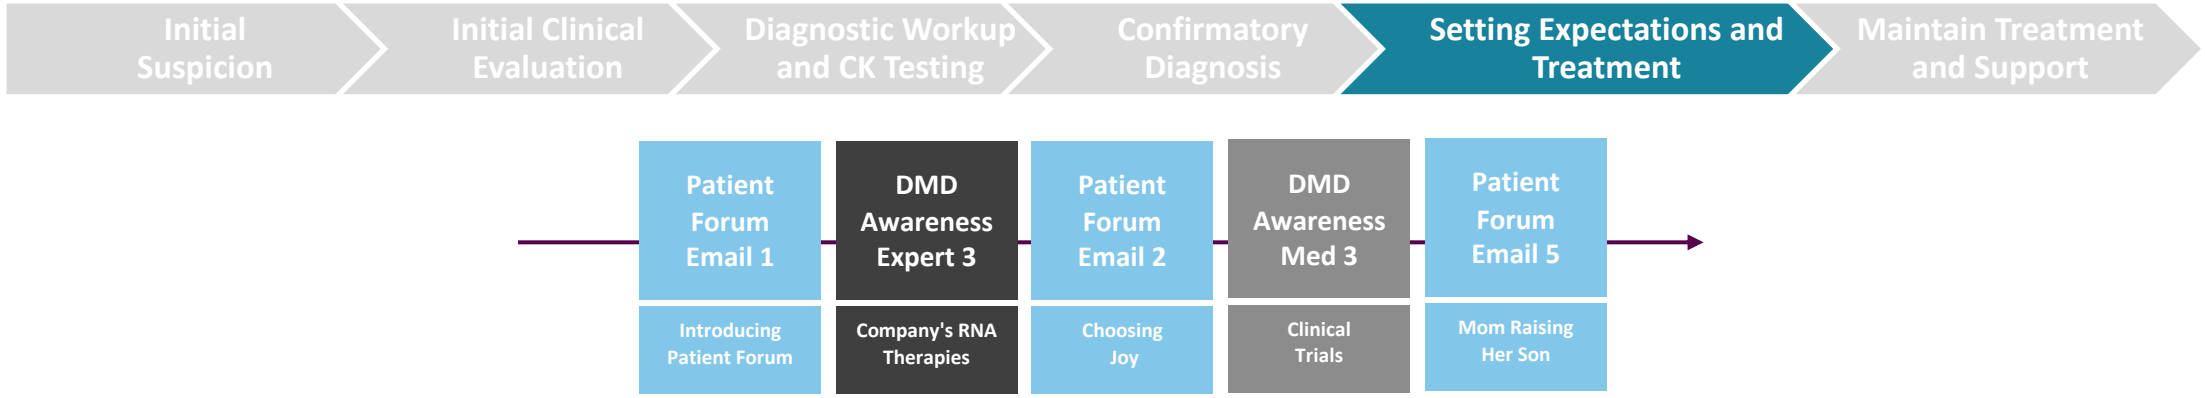
CONFIDENTIAL. FOR INTERNAL USE ONLY.

Confirmatory Diagnosis Journey Stage Objectives and KPIs



Objective 2: Expand the understanding of early intervention and its importance			
KPI 1	KPI 2	KPI 3	
Engagement with the "Diagnosing Duchenne" page on Duchenne.com	Engagement with the "The Role of Genetics" web page on the DSA website	Engagement with the "Managing Duchenne" web page on DSA website	
Objective 3: Increase awareness of therapy options for the ambulatory and non-ambulatory populations			
KPI 1	**KPI 2**	**KPI 3**	**KPI 4**
Engagement with "Engaging with Various Specialist"	Engagement "Community Resources" web page on the DSA website	Engagement with the "Support and Independence" web page on Duchenne.com	Engagement with the "Talking about Duchenne" web page on the DSA website
KPI 5	**KPI 6**	**KPI 7**	
Engagement with the "Making Friends and Being Social" web page on the DSA website	Engagement with the "Mental Health" web page on the DSA website	Engagement with Patient Assistance Program	

Setting Expectations and Treatment Journey Stage Objectives and KPIs

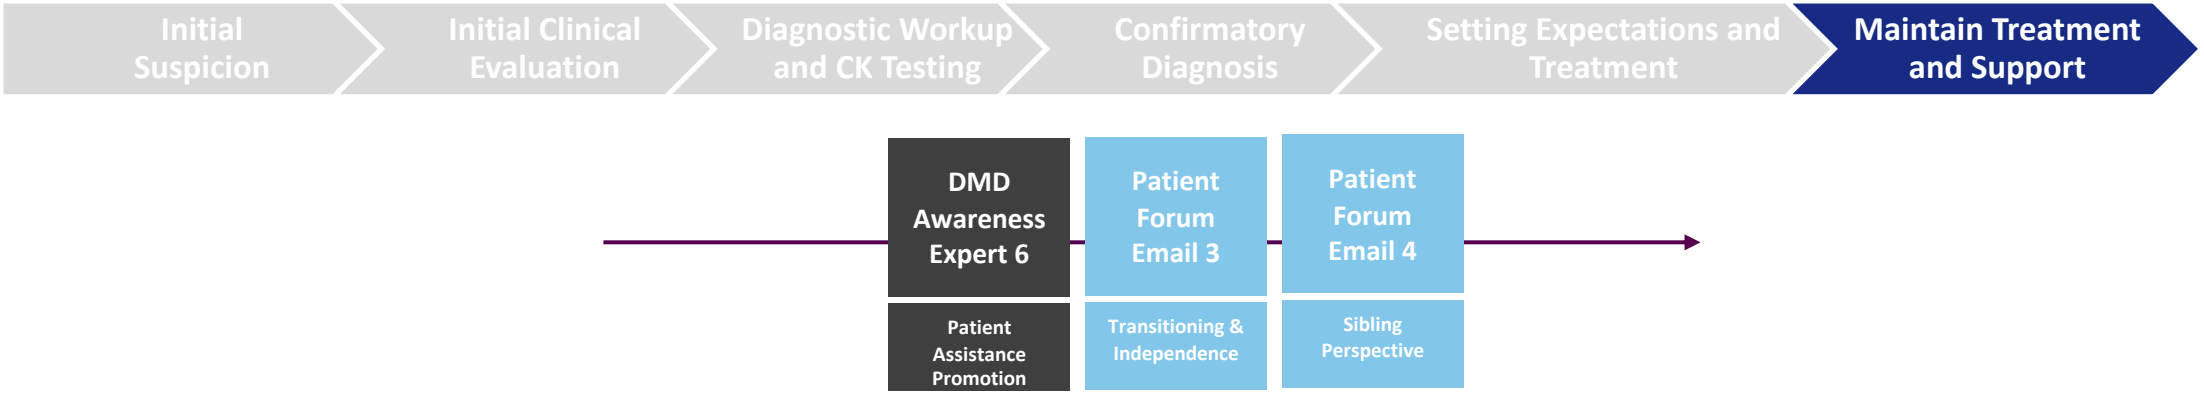


Objective 3: Increase awareness of therapy options for the ambulatory and non-ambulatory populations			
KPI 1	**KPI 2**	**KPI 3**	**KPI 4**
Engagement with “Engaging with Various Specialist”	Engagement “Community Resources” web page on the DSA website	Engagement with the “Support and Independence” web page on the DSA website	Engagement with the “Talking about Duchenne” web page on the DSA website
KPI 5	**KPI 6**	**KPI 7**	
Engagement with the “Making Friends and Being Social” web page on the DSA website	Engagement with the “Mental Health” web page on the DSA website	Engagement with the Patient Assistance Program	
Objective 4: Establish confidence in discussing DMD and advocating for their child			
KPI 1	**KPI 2**	**KPI 3**	
Engagement with the “Research Strategies Targeting Dystrophin” web page on the DSA website	Engagement with the “Research Approaches Targeting Muscle Growth and Protection” page on the DSA website	Engagement with branded splitter website	
Objective 5: Drive engagement with support resources and the community			
KPI 1	**KPI 2**	**KPI 3**	
Engagement with the Patient Forum Engagers Videos on “Duchenne Wisdom” page on the DSA website	Engagement with the “Support and Independence” web page on the DSA website	Join Patient Forum Event	

C. On Therapy and P. On Therapy Email Objectives and KPIs based on Patient Journey

CONFIDENTIAL. FOR INTERNAL USE ONLY.

Maintain Treatment and Support Journey Stage Objectives and KPIs



Objective 3: Increase awareness of therapy options for the ambulatory and non-ambulatory populations			
KPI 1	**KPI 2**	**KPI 3**	**KPI 4**
Engagement with “Engaging with Various Specialist”	Engagement “Community Resources” web page on the DSA website	Engagement with the “Support and Independence” web page on the DSA website	Engagement with the “Talking about Duchenne” web page on the DSA website
KPI 5	**KPI 6**	**KPI 7**	
Engagement with the “Making Friends and Being Social” web page on the DSA website	Engagement with the “Mental Health” web page on the DSA website	Engagement with the ”Managing Duchenne” web page on the DSA website	
Objective 5: Drive engagement with support resources and the community			
KPI 1	**KPI 2**	**KPI 3**	
Engagement with the Patient Forum Engagers Videos on “Duchenne Wisdom” page on the DSA website	Engagement with the “Support and Independence” web page on the DSA website	Join Patient Forum Event	
Objective 6: Generate awareness of the Patient Assistance Program and the process of starting and staying on therapy			
KPI 1	**KPI 2**	**KPI 3**	
Engagement with Patient Assistance Program	Watch Patient Forum Engager Videos on forum landing page	Engagement with the pages under “Living with Duchenne” website section on the DSA website	

Next Steps

- Company to review
- Review GT-FAQ Journey with 9001 team
- Kick off survey design and technology integration
- Kick off new email development
- Recalibrate SFMC master audience against personas, recalibrate email cadence
- Deploy and measure

THANK YOU
