ETS

# ETS Social Media Plan

2022

Nicole Broomhead

EMERGING THERAPY SOLUTIONS®

©2021 Emerging Therapy Solutions, Inc.

# Social Media Goals

1. Grow our number of followers on LinkedIn by 500 by the end of 2022.
    - Currently at 290 followers)
2. Increase the number of unique visitors to our website from LinkedIn by 25% by July 2022.
3. Increase the number of conversions from LinkedIn by 15% by July 2022.
    - (Conversions = the number of visitors that filled out our contact form on the website)
4. Increase the average number of post impressions on LinkedIn by 50% by July 2022
    - (avg for Q1=104, Q2=108, Q3=122)

©2021 Emerging Therapy Solutions, Inc.

# Audience

| Reinsurance / Stop-Loss Carriers | Self Insured / Health Plans | Providers |
| --- | --- | --- |

Picked 3 audiences we are confident we can impact via social

©2021 Emerging Therapy Solutions, Inc.

# Competitors

| | Networks active | Number of followers | Strengths | Weaknesses | Content that resonates |
|---|---|---|---|---|---|
| **INTERLINK** | LinkedIn | LinkedIn: 512 | They post a lot about the company culture. Use tons of pictures/graphics. Post lots of round table / webinar registrations | They don't post much about their offerings. The page doesn't have a theme or clear consistent branding – looks a bit unprofessional | Posts that share images of staff and events they hosted |
| **6 Degrees Health** | LinkedIn<br>Twitter | LinkedIn: 4,235<br>Twitter: 71 | Consistent posting, but infrequent. They brand all of their graphics. They tag a TON of people and use many hashtags. Their twitter is more focused on news and LinkedIn is | Not a lot of posts, their employee posts are a bit cheesy. Post mainly two types of content: employee posts and their chat events. | Employee posts outperform all other posts |
| **Optum** | LinkedIn<br>Facebook<br>Twitter<br>Youtube<br>Instagram | LinkedIn: 384, 280<br>Facebook: 90,275<br>Twitter: 26,100<br>Youtube: 10,919,000 views<br>Instagram: 4,131 | They post many variations of content (podcasts, videos, blogs, videos, graphics, ebook). Their page is very cohesive and uses their branding on every post. They post about their team, stats, testimonials, contents, patients. They use a lot of infographics on twitter and instagram | Because of the wide range of content, it can be hard to find a specific type of content or differentiate between a blog or a registration for a webinar. The number of posts per week isn't consistent. | CEO receives an award. Cancer screen week |
| **Aetna** | LinkedIn<br>Facebook<br>Twitter<br>Youtube<br>Instagram | LinkedIn: 372,021<br>Facebook: 124,146<br>Twitter: 53,600 followers<br>Youtube: 12,339,383 views<br>Instagram: 14,100 followers | Cohesive branding. Content is primarily videos and graphics. Seems to average about 80 likes per post. Use a lot of short videos (10-20 seconds). They post once a day. | They talk a lot about general health and wellness, which might work for them, but it doesn't work for us | Video of volunteer work |

# SWOT Analysis – Social Media

| | Positive | Negative |
|---|---|---|
| **Internal** | **Strengths**<br>• Consistent number of webinars for our audience to register for<br>• We have a lot of industry news to talk about<br>• We have a decent number of followers for a smaller sized business<br>• We're consistent with posting events<br>• We're more consistent than INTERLINK | **Weaknesses**<br>• Lack video content<br>• Inconsistent posting schedule<br>• Lack variation of content<br>• Lack consistent branding on most posts<br>• Lack company updates, posts about the team<br>• Don't use any graphics / infographics<br>• Don't post much about our services<br>• Don't post any customer testimonials<br>• Don't post any partner updates<br>• We don't get mentioned in any posts<br>• Very low engagement |
| **External** | **Opportunities**<br>• Using Facebook as another channel<br>• Using Twitter as another channel<br>• Reusing video content in different formats (GIFs, short clips)<br>• Posting about Dave and our leadership team as well as each different department<br>• Repurposing content in different formats (infographic, quote graphic, stats graphics, video, etc.) | **Threats**<br>• The big players (Aetna, Optum, Cigna) have a large share of voice on social with hundreds of thousands of followers<br>• The big players also have a larger marketing team and a larger budget so they can churn out content faster and on a larger scale than we can<br>• Not being seen as a major player in the industry<br>• Missing out on engaging with our audience and helping them trust us and get to know us |

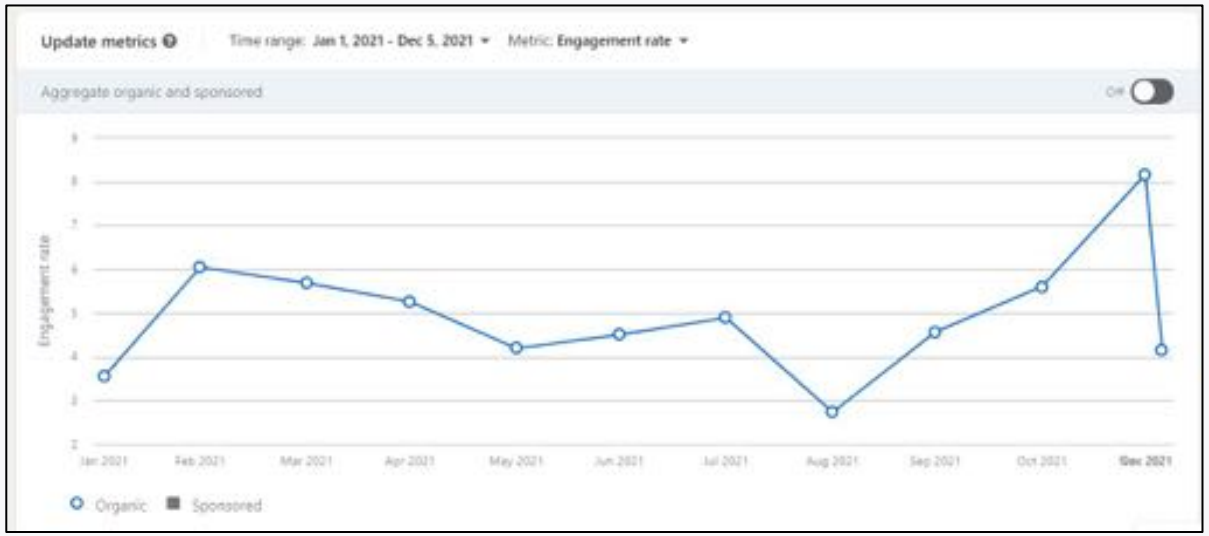
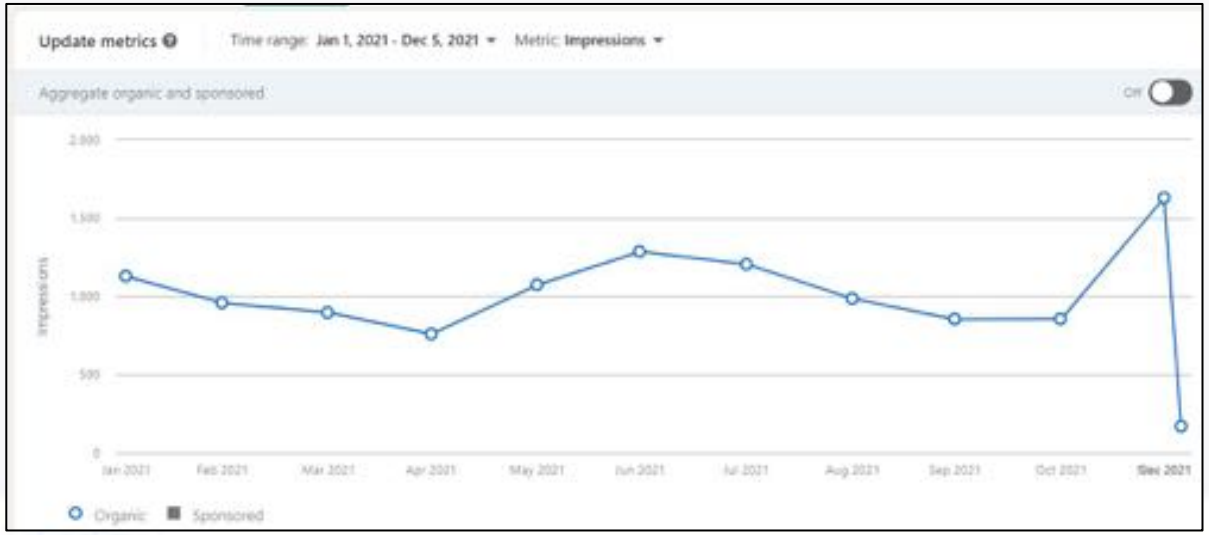
# Definitions

- **Impressions** shows the number of times each update is visible for at least 300 milliseconds with at least 50% in view on a (signed in) member's device screen or browser window.
- **Unique impressions** shows the number of times your updates were shown to unique (signed in) members.
- **Clicks** shows the number of clicks on your content, company name, or logo by a (signed in) member. This doesn't include interactions (shares, Reactions, and comments).
- **CTR (click-through-rate)** shows the number of clicks your update received divided by the number of impressions your update received.
- **Reactions, Comments, and Shares** shows the number of reactions, comments, and times your content was shared by members, including Direct Sponsored and video posts.
- **Engagement rate** shows the number of interactions plus the number of clicks and followers acquired, divided by the number of impressions.

©2021 Emerging Therapy Solutions, Inc.

# Engagement & Impressions





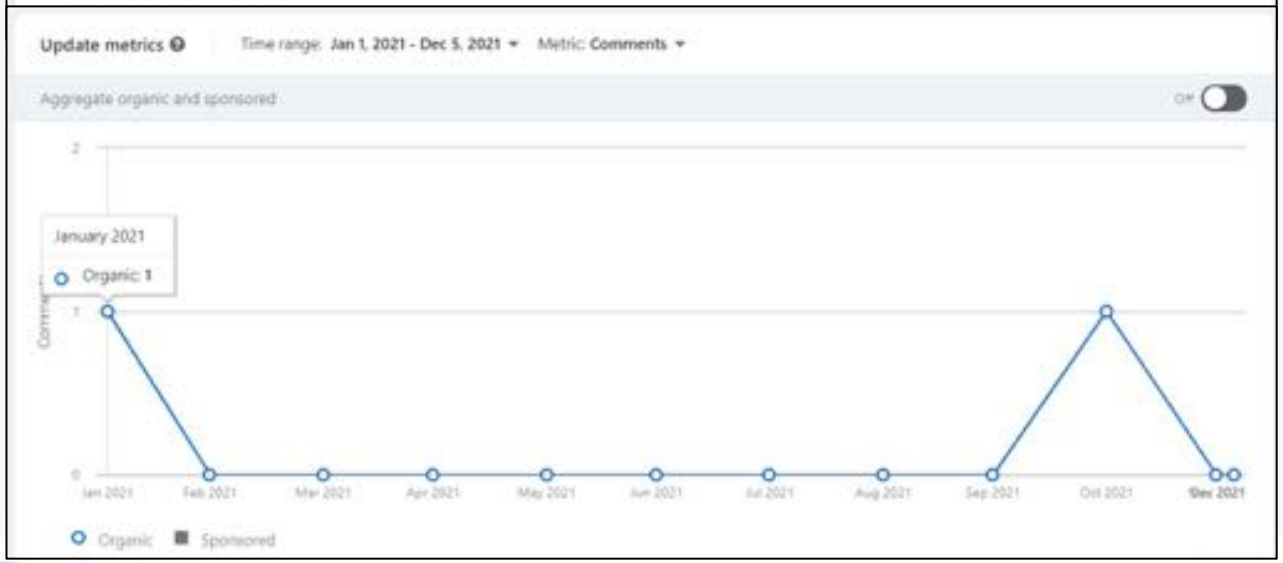
**Insight:** Impressions & engagement were fairly consistent with a slight downward trend.
Posts that mention events, live panels, Dave, and company news perform the best for both metrics.
We performed the best for both metrics in Q1.

**Expectations:** We should always be growing in engagement and impressions. We want in increase impressions by 50% next year. Average engagement for LinkedIn is 0.35%. Images and videos always boost engagement and impressions.

**Why it matters:** Impressions are the number of times our post reached someone and engagement is how relevant or interesting the post was to in order to make them interact with it.

©2021 Emerging Therapy Solutions, Inc.

# Clicks & Comments



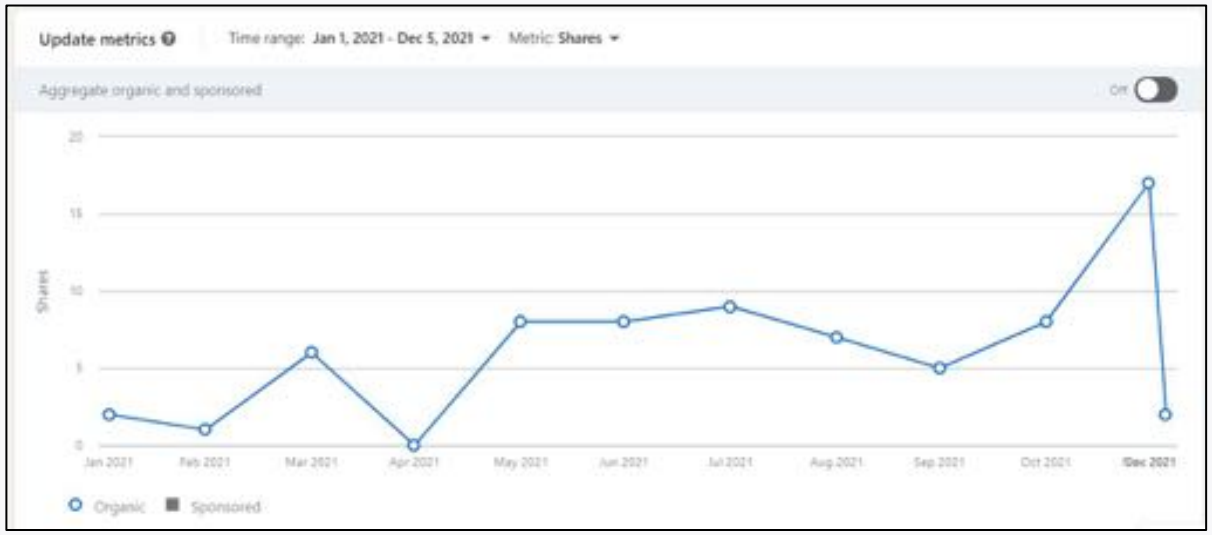
**Insight:** Clicks were the highest in Q1 with 1 comment in Q1 and Q3. Not enough data to infer why this is. Steady clicks on posts about FDA approvals and company events.

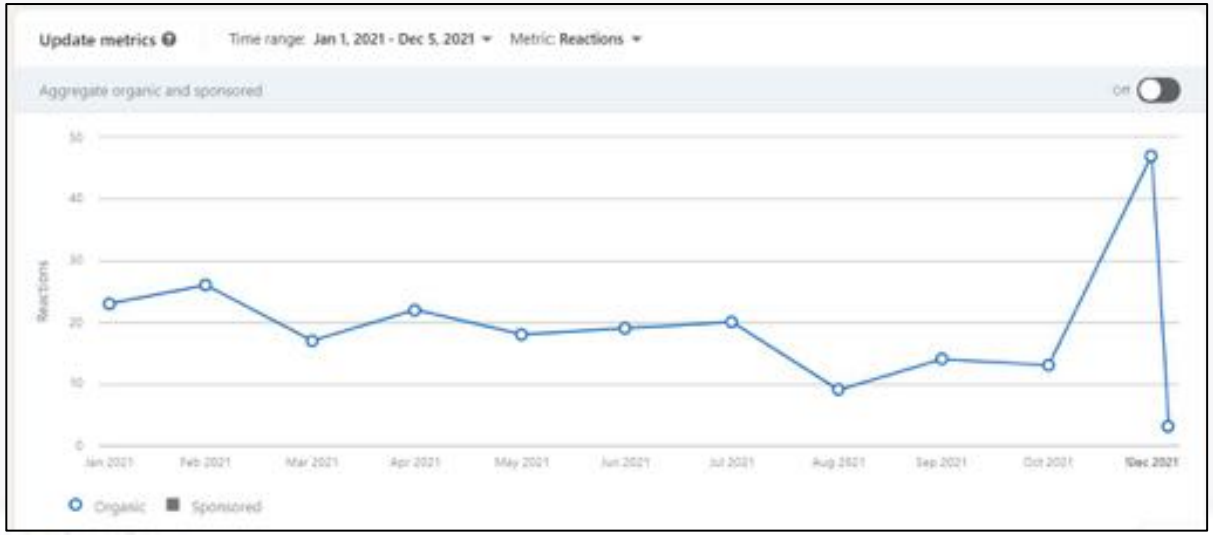
**Expectations:** We need to drive people to our website and improve clicks there. Comments should
come from employees and the businesses we tag.

**Why it matters:** We want people to fill out a contact
form or call us via our website b/c of LinkedIn posts so we need to closely monitor clicks with that goal in mind. Comments will improve our impressions and audience engagement. It is another
way to show the audience that we are market leaders.

©2021 Emerging Therapy Solutions, Inc.

# Shares & Reactions





**Insight:** Likes/reactions were highest in Q1 with 77
and Q2 not far behind with 66. Shares were highest
in Q3 with 22.

**Expectations:** 22 shares is amazing, but that will not
be the norm. We should shoot for an average of 5 per relevant post (company update, press release, video)

**Why it matters:** Shares and reactions will improve our
impressions and audience engagement. People are
More likely to engage with a post that is shared or
already has reactions and comments. It is another
way to show the audience that we are market

©2021 Emerging Therapy Solutions, Inc.

# Current Social Media Benchmarks

| Channel | Number of followers | # of Posts | Total Engagement Rate | Total Click-through rate | Total Impressions |
|---|---|---|---|---|---|
| LinkedIn | 290 (TG: 790+) | 85 (TG: 200) | 3.5% (TG: 29.75%) | 1.7% (TG: 5%?) | 9,189 (TG: 42,500) |

- We post much less frequently than our competitors. Our number of followers is decent for a business our size, but we intend to grow 500 more followers in 2022
- We need to increase the variety of content and hopefully increase our engagement rate and impressions

| Channel | Video Plays | Videos Finished | Unique Viewers | Likes | Downloads |
|---|---|---|---|---|---|
| Vimeo | 291 | 35 | 130 | 0 | 0 |

- We currently post our webinars as protected content that can only be accessed via the share link.
- We should create and post more videos that aren't protected so people can use this channel to get info about us.
- Likes and comments are turned off b/c we don't have the time to monitor them, but this could be something we revisit in the future.

©2021 Emerging Therapy Solutions, Inc.

# Social Media Audit

| LinkedIn | Vimeo |
|---|---|
| **What's working:** posts about press release, ours would be best, posts that are emotional (about a child receiving a life saving therapy), posts about us speaking at an event, posts about our employees. | **What's working:** Gene & Cell therapy basics or 101 videos, overviews on the company. |
| **What's not working:** News posts or awareness days about disease – unless they have some sort of new drug approved, registration pages for our webinars – we need to do something more here to improve registrants via social. | **What's not working:** Long videos without sections, condition specific videos (although I'm not very confident in this finding, it could be because we didn't promote the recording enough). |
| **Lessons / hypotheses:** If we want to use social as a driver for website visits, we need to improve our web content for prospects and clients alike. We need to post different webpages more frequently and start blogging. We also need to generate more press. People engage very highly with our releases and content that is about the company.<br><br>If we want to use social to increase webinar registrations, we need to create a variation of posts like gifs, graphics, intro videos, infographics about the topic, blogs about the topic. | **Lessons / hypotheses:** We should continue with brand videos and the basics of the industry. If videos are over 20 minutes, we should create sections/chapters or break them up into two videos. |

# Gathering Company Culture/Values Content

Interview 10 employees (1 or 2 from each team)

- What makes you proud to work for ETS?
- Would you recommend working for ETS to a friend?
- What do you love about the industry?
- What makes you excited to come to work each day?
- How does your role impact the company?

©2021 Emerging Therapy Solutions, Inc.

# Social Media Workflow

Nicole sends posts to Sara for Review
(Wednesday – after we get weekly news)

→

Nicole sends posts to Michelle / Jane for review
(Thursday)

→

Nicole schedules posts for LinkedIn for the following week
(Friday EOD for the following week)

©2021 Emerging Therapy Solutions, Inc.

# Q1 2022 Focus

**3rd communication pillar - company culture, values**

**Goal: Engagement**

- Company updates
- Employee spotlights / achievements
- Post about leadership team and their years of experience
- Connect each post back to our audience - how we can help, our services, pain points
- Leading audience to our website - our web traffic was very low in Q1
- Product updates, new offerings
- Pipeline and what we expect to come in the following quarters
- Add a products section to our linkedin page

©2021 Emerging Therapy Solutions, Inc.

# Q2 2022 Focus

**2nd Communication Pillar - Branded/promo/sales content (show real world application)**

**Goal: Conversions**

- Webinars, conferences, presentations
- leverage partners, customers, providers, other companies we monitor to increase impressions on our posts
- Customer/provider spotlights
- Network and programs of excellence and experience
- Leverage and repurpose video content

©2021 Emerging Therapy Solutions, Inc.

# Q3 2022 Focus

**1st communication pillar - Educate and inform our audience**

**Goal: Impressions and reach**

- Post regularly and frequently
- Another push of company updates and employees
- Graphics to break content up into more digestible formats to remain relevant to our audience
- Repurpose videos
- News posts
- How to use our portal

©2021 Emerging Therapy Solutions, Inc.

# General Recommendations

**Best Practices**

- Spacing between lines with captivating first sentence for them to click and read the full post. Emojis, paragraphs, bullets, graphics, capitalization to break up content & draw attention to the most important parts.
- Ensure employees are listed as employees of ETS
- Tagging industry leaders and companies where appropriate
- Medical services and sales to follow industry leaders, contacts, customers and share, like, comment on all posts
- Use hashtags with the most followers, posts
- Half of posts on LinkedIn should be images (49%), the second is articles (38%)
- Images and videos generate higher engagement
- Videos generate more comments
- Graphics generate more engagement
- Articles generate higher engagements per impressions
- Improve our /about headline - It is not completely clear what we do or what we sell

**Content Recs.**

- More content driving them to the website
- More videos & posting video directly into LinkedIn so they can watch on their newsfeed. Break up recordings and repurpose
- Look into the use of info graphics using some data in our reports, without giving away all the good stuff
- Customer testimonials, interviews, case studies
- Experiment with different types of content - polls, ask me anythings, infographics, interviews, short video clips, employee / partner highlights
- Repurpose our content in different ways
- Share company milestones
- Watch trending topics in the industry and post about them
- Use data from our reports or customers
- Post blogs
- Post from LifeTrac account pushing people to ETS

©2021 Emerging Therapy Solutions, Inc.
